

The FPG series combines flexibility, ease of installation, high capacity, and highest value in a full complement of stock gang wall panels.

Combine with our unique full panel labeling process to add a distinctive signature to any project.

Virtually unlimited label color choices and your custom graphics create maximum decorator options.

Laser-cut process and high strength materials eliminate crooked connectors and warped / dented panels.

Contemporary design with radiused corners achieves a custom panel look at a stock panel price.

Scratch resistant powder coat finish ensures uniform coverage on panel face and edges.

- **Attractive satin black 14 gauge steel with durable powder coated finish or solid stainless steel with brushed finish**
- **Cost effective custom panel appearance adds a distinguished look to your project**
- **Laser-cut for precision accuracy and fit**
- **Large selection of in stock panel types for maximum flexibility**
- **Accepts all FlexiConn series connectors (Neutrik D® style)**
- **Decora® panels available**
- **Free connector loading**

FPG series - Gang Wall Panel, Satin Black (Ceramic Coated)

Wall panel shall be of 14 gauge steel, shall have radiused corners to .375 and shall be secured with #6 socket head screws. Panels shall have a ceramic plastic satin black finish so as not to create specular light reflections or solid stainless steel with #3 brushed finish. Panels shall mount on standard trade size gang boxes. Panels shall be Mystery Electronics FPG series as specified.

**additional panel types may be found at www.mysteryelectronics.com*
