FITTING THE RACK EARS

Check the contents:

- 1 x AA8196-L XONE:43 RACK EAR LEFT
- 1 x AA8196-R XONE:43 RACK EAR RIGHT
- 6 x AB0188 NUT M4 NYLOCK
- 6 x AB5680 SCREW M4X10 PAN POZI BK

Tools required:

- T8 Torx screwdriver
- Pozi 2 screwdriver
- 7mm spanner
- A small container to keep screws in.

Ensure that the power to the unit has been turned off and disconnected completely from the mains.

Step 1:

- Remove and retain 2 screws from front panel.
- Remove and retain 4 screws from rear panel upper phono sockets.

Step 2:

- Remove and retain 4 screws from side panel of the mixer (2 each side).
- Turn console over onto its front panel – take care not to scratch the unit.

Step 3:

- Remove and retain 6 screws from base panel.
- Note that the 2 nearest the rear connector remain in place.

FITTING THE RACK EARS

Step 4:

- Gently slide the two halves of the console apart until the rear connector PCB is wholly visible.

Step 5:

- With care unplug the grey flat wireform from the connector PCB.
- There is a single wireform on a Xone:43.
- (Xone:43 pictured).
- The console base and front panel can now be separated.

- There are two wireforms on a Xone:43C.
- With care unplug the grey flat wireforms from the connector PCB.
- (Xone:43C pictured).
- The console base and front panel can now be separated.

Step 6:

- Choose the rack ear orientation you require: note that they are handed – check holes indicated align with the corresponding screw holes in the chassis.
- (Narrow pictured).

- (Wide pictured).
