

QU-16

RACK MOUNTABLE DIGITAL MIXER

The Qu digital mixer series is designed to be simple for any user to operate.

The Qu-16 has 16+1 faders in 3 layers, 16 mono & 3 stereo DSP channels, 4FX units with their own dedicated return, resulting in a total of 30 processing channels. 4 Mono and 3 stereo auxiliary mix busses are available.

Every function has a dedicated hardware button to complement the touchscreen.

A dSNAKE remote audio port allows Qu-16 to connect to AB & AR AudioRacks as well the ME personal monitor system.

16 Channels of automatic mic mixing, 3 user levels, USB multi-track audio and a customisable fader layout make the Qu-16 a powerful mixer.
