

ALFATRON ALF-5X/10X/12X/20X/30X-CAM
HD Color Video Camera

ALFATRON ELECTRONICS GmbH GERMANY
User Manual

Attention

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

WARNING: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Radiation Exposure

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions:

- (1) this device may not cause interference, and
- (2) this device must accept any interference, including interference that may cause undesired operation of the device.

"Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence.

L'exploitation est autorisée aux deux conditions suivantes :

- (1) l'appareil ne doit pas produire de brouillage, et
- (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement."

Radiation Exposure:

This equipment complies with IC radiation exposure limits set forth for an uncontrolled environment.

Déclaration d'exposition aux radiations: Cet équipement est conforme aux limites d'exposition aux rayonnements IC établies pour un environnement non contrôlé.

Do not dispose of this product with the normal household waste at the end of its life cycle. Return it to a collection point for the recycling of electrical and electronic devices. This is indicated by the symbol on the product, user manual or packaging

The materials are reusable according to their markings. By reusing, recycling or other forms of utilization of old devices you make an important contribution to the protection of our environment.

Please contact your local authorities for details about collection points.

Electrical Safety

Installation and operation must comply with electrical safety standards

Caution while in transportation

Avoid stress, vibration, and soakage in transportation, storage, and installation.

The polarity of power supply

The power supply of the product is $\pm 12V$, the max electrical current is 2A. The polarity of the power supply drawing.

**Precautions to take when installing the camera**

Never move the camera by pulling on the camera head. Do not rotate the camera head by hand as it will damage the mechanism.

This series item must be installed on a flat smooth desk or platform, and it cannot be installed slantways;

If the camera is installed on a TV or a computer, the base can be fixed by four double-sided adhesive trays.

Do not apply any corrosive liquid, on the cover which is made up of organic material.

Please make sure there are no obstacles in the way of the rotation of the camera.

Only power on the unit after installation has been completed.

Don not disassemble the unit.

We are not responsible for any unauthorized modification or dismantling.

Attention

Electromagnetic field under a certain rate may affect camera image!

1. Fast Installation

1.1 Camera Interface Explanation

1 Lens	5 Tripod Screw Hole	9 HDMI Output
2 Base	6 RS232 (IN)	10 LAN
3 Remote Controller Receiver Light	7 USB2.0	11 Power Supply
4 Button Dial Switch	8 USB3.0	

1.2 Power on initial configuration

1) Power on: Connect DC12V power supply adapter with power supply socket.

2) Initial configuration: Power on with power indicator light on and remote-control receiver light blinking, camera head moves from the bottom left to the bottom, and then goes to the HOME position (intermediate position of both horizontal and vertical), while the camera module stretches. When remote control receiver light stops blinking, the self-checking is finished

Note: If you set preset 0, when the Power-on self-test is completed, the camera automatically moves to the preset 0 positions.

1.3 Video Output

1) Video Output from LAN

a. Network Cable Connection Port:

b. Webpage Login: Open your browser and enter 192.168.5.163 in the address bar (factory default); press Enter to enter the login page; click on the "player is not installed, please download and install!" and follow the installation steps for installation. Then enter the username *admin* and password *admin* (factory default); press Enter to enter the preview page, users can carry out PTZ control, video recording, playback, configuration, and other operations.

2) HDMI Video Output

a. HDMI Video Cable Connection

b. Connect the camera and the monitor via HDMI video cable; video output is available after the camera self-test.

3) USB3.0 video output

a. USB3.0 video cable connection

b. Connect the camera and the monitor via USB3.0 video cable, open video display software, select image device, and then video output will be available.

5) USB3.0 compatible with USB2.0 output

- a. USB3.0 video cable connection
 - b. Connect the camera and the monitor via USB3.0 video cable, open video display software, select image device, and then video output will be available.
- 6) USB2.0 video output
- a. USB2.0 video cable connection:
 - b. Connect the camera and the monitor via USB2.0 video cable, open video display software, select image device, and then video output will be available.

1.4 Bracket mount

Note: Bracket can only be wall-mounted or upside-down mounted on template and concrete wall but cannot be installed on the plasterboard.

2. Product overview

2.1 Product Introduction

2.1.1 Dimension

Figure 2.2 Camera dimension

2.1.2 Accessory

When you unpack, check that all the supplied accessories are included:

Configuration	5X-10X-12X-20X
Standard	1x Power adapter
	1x USB3.0 and 1x USB2.0 cables
	User manual
	Warranty card
	IR Remote controller
	Wall or Ceiling Mount Bracket

2.2 Main Features

2.2.1 Camera Performance

The features include advanced ISP processing algorithms to provide vivid images with a strong sense of depth, high resolution, and fantastic color rendition. It supports H.265/H.264 encoding which makes motion video fluent and clear even with less than ideal bandwidth conditions.

1. **Superb High-definition Image:** It employs 1/2.8-inch-high quality CMOS sensor. Resolution is up to 1920x1080 with a frame rate of up to 60 fps.
2. **Various Optical Zoom Lens:** It has a 5X/10X/12X/20X optical zoom lens for options. The 5X zoom lens is with an 80.9 ° wide view angle without distortion.
3. **Leading Auto Focus Technology:** Leading autofocus algorithm makes the lens a fast, accurate, and stable auto-focusing.
4. **Low Noise and High SNR:** Low Noise CMOS effectively ensure high SNR of camera video.
Advanced 2D/3D noise reduction technology is also used to further reduce the noise while ensuring image sharpness.
5. **Quiet PTZ:** By adopting a high accuracy step driving motor mechanism, it works extremely quiet and moves smoothly and very quickly to the designated position.
6. **Multi-Format Video Outputs:** support HDMI, USB, wired LAN
7. **Multiple Remote Controls:** There is IR remoter and 2.4G wireless remote for options. The 2.4G wireless remote controller will not be affected by angle, distance, or IR interference. Support transparent transmission function.
8. **Low-power Sleep Function:** Support low-power sleep/wake up, the consumption is lower than 500mW under sleep mode
9. **Support Multiple Control Protocol:** Support VISCA, PELCO-D, PELCO-P protocols which can also be automatically recognized.
Support VISCA control protocol through the IP port.
10. **RS-232 Cascade Function:** ST series support RS-232 cascade function which is convenient for installing.
11. **255 Presets Positions:** Up to 255 presets (10 presets by remoter).
12. **Wide Application:** Tele-education, Lecture Capture, Webcasting, Videoconferencing, Tele-training, Tele-medicine, Interrogation, and Emergency command systems.

2.2.2 Network performance

1. **Audio Input Interface:** Support 16000,32000,44100,48000 sampling frequency and AAC, MP3, PCM audio coding.
2. **Multiple Audio/Video Compression:** Support H.264/H.265 video compression; AAC, MP3, and PCM audio compression;
Support compression of resolution up to 1920x1080 with frame up to 60 fps and 2 channel 1920x1080p with 30 fps compression.
3. **Multiple network protocol:** Support ONVIF, RTSP, RTMP protocols and RTMP push mode, easy to link streaming media server (Wowza, FMS)

Input/output Interface	
Video Interfaces	ALF-5/10/12/20/30X-CAM USB2.0, USB3.0, HDMI, LAN, RS232 (input)
Image code stream	Double streams output simultaneously
Video Compression format	H.264, H.265
Control Signal Interface	RS-232 Ring through RS232 output, RS-485
Control Protocol	VISCA/Pelco-D/Pelco-P; Baud Rate: 115200/9600/4800/2400bps
HD IP Interface	100M IP port(100BASE-TX); support IP Visca control protocol
Network Protocol	RTSP/RTMP, ONVIF
Power Interface	HEC3800 outlet (DC12V)

PTZ Parameter	
Pan Rotation	±170°
Tilt Rotation	-30°~+90°
Pan Control Speed	0.1 -180°/sec
Tilt Control Speed	0.1-80°/sec
Preset Speed	Pan: 60°/sec, Tilt: 30°/sec
Preset Number	255 presets (10 presets by the remote controller)
Other Parameter	
Supply Adapter	AC110V-AC220V to DC12V/2A
Input Voltage	DC12V±10%
Input Current	1A(Max)
Consumption	12W (Max)
Store Temperature	-10°C to +60°C
Store Humidity	20% - 95%
Working Temperature	-10°C to +50°C
Working Humidity	20%~80%
Dimension	150mmX150mmX167.5mm
Weight	1.4KG
Working Environment	Indoor
Remote Operation (IP)	Remote Upgrade, Reboot, and Reset
Accessory	Power Supply、RS232 Control Cable、USB3.0 Cable、USB2.0 Cable、Remoter、Manual、Warranty card
	Wall or Ceiling Bracket

2.4 Interface Instruction

2.4.1 External Interface

The external interface of the ALF-5/10/12/20/30X-CAM model: RS232 input, USB3.0, USB2.0, HDMI, LAN, DC12V power interface.

2.4.2 Bottom Dial Switch

ALF-5/10/12/20X-CAM: two DIP switches are set to ON or OFF to select different modes of operation as shown in Table 2.3

Table 2.3 Dial Switch setting

No.	SW2	SW1	Explanation
1	ON	OFF	Working Mode
2	ON	ON	USB3.0 Software Upgrade Mode
3	OFF	ON	ARM Software Upgrade Mode

Note: Working mode can be applicable for web upgrades.

2.4.3 RS-232 Interface

1) RS-232C interface specification as shown below

2) RS-232 Mini-DIN 8-pin Port Definition

NO.	Port	Definition
1	DTR	Data Terminal Ready
2	DSR	Data Set Ready
3	TXD	Transmit Data

4	GND	System Ground
5	RDX	Receive Data
6	GND	System Ground
7	IR OUT	IR Commander Signal
8	NC	No Connection

3) RS232 (DB9) Port Definition

NO.	Port	Definition
1	DCD	Data Carrier Detect
2	RDX	Receive Data
3	TXD	Transmit Data
4	DTR	Data Terminal Ready
5	GND	System Ground
6	DSR	Data Set Ready
7	RTS	Request to Send
8	CTS	Clear to Send
9	RI	Ring Indicator

1) VISCA networking as shown below:

Camera cascade connection method

3. Application Instruction

3.1 Video Output

3.1.1 Power-On Initial Configuration

Connecting the power, the camera will have initial configuration, R indicator light will be flashing. When the camera return to the HOME position (middle position for P/T), and lens finish zoom in/out, the auto-testing is finished. IR led will also stop flashing. If the preset 0 is set, the camera will rotate to the 0 preset positions after the initial configuration.

3.1.2 Video Output

Connect to the video output cable: the user select the output mode according to the machine model.

Figure 1.4.1 is for your reference (output interface introduction for each product)

1) network output: connect this product and your computer through a network cable, then open the browser, enter the camera IP address (factory default 192.168.5.163) in the address bar, then to the login page and input a user name and password (factory default are "admin"), Finally enter the preview page, and the image comes out.

(Note: If you forget your user name, password, IP address, you can manually restore the default by the remote control key combination * #)

2)3G-SDI output or DVI (HDMI) output: Connect the monitor with the corresponding video output interface, then the monitor output image.

3)USB3.0 output: Connect this product with the computer USB3.0 interface (blue), open the Device Manager to see whether there is an imaging device and whether the Universal Serial Bus controllers recognize the USB3.0 device. After properly identified, open the software, choose the imaging device, and then it will output the image.

4)USB3.0 compatible with USB2.0 output: Connect this product with a computer USB2.0 interface (black), open the Device Manager to see whether there is an imaging device and whether the Universal Serial Bus controllers recognize USB3.0 device. After properly identified, open the software, choose the imaging device, and then it will output the image.

3.2 Remote Controller

3.2.1 Keys Instruction

1. Standby Key

After a 3S long press, the camera will step into standby mode. Long press 3S again, the camera will self-test again and back to the HOME position. (Note: If power-on mode is turned on and Preset 0 is set, and there is no operation within 12s, it will automatically point to the specified preset position.

2. Camera Address Selection

Select the camera **address** which wants to be controlled

3. Number Key

Set or run 0-9 presets

4, *, # Key

Key combination use

5. Focus Control Key

Auto Focus: Enter into autofocus mode.

Manual Focus: The camera focus mode is manual

Switch the camera focus mode to manual focus by pressing [focus +] or [focus -] to adjust.

6. Zoom Control Key

Zoom + : Lens near

Zoom - : Lens far

7. Set or Clear Preset key:

Set Preset: Set preset key + 0-9 number key:

Clear Preset key: Clear preset key + 0-9 number key

8. Pan/Tilt Control Key

Press ▲ Key: Up

Press ▼ Key: Down

Press ◀ Key: Left

Press ▶ Key: Right

"HOME" Key: Return to the middle position or enter into the next level menu

9. BLC Control Key

Back Light ON / OFF: Turn on or off the backlight

10. Menu Setting

Open or close the OSD menu

Enter/exit the OSD menu or return to the previous menu.

11. Camera IR Remote Control Address Setting

【*】+【#】+【F1】: Camera Address No.1

【*】+【#】+【F2】: Camera Address No. 2

【*】+【#】+【F3】: Camera Address No. 3

【*】+【#】+【F4】: Camera Address No. 4

12. Key Combination Functions

1) 【#】+【#】+【#】: Clear all presets

3) 【*】+【#】+【9】: Flip switch

5) 【*】+【#】+【3】: Menu set to Chinese

7) 【*】+【#】+Manual: Restore the default user name, password, and IP address

9) 【#】+【#】+【1】: Switch the video format to 1080P50

11) 【#】+【#】+【3】: Switch the video format to 1080I50

13) 【#】+【#】+【5】: Switch the video format to 720P50

15) 【#】+【#】+【7】: Switch the video format to 1080P25

17) 【#】+【#】+【9】: Switch the video format to 720P25

2) 【*】+【#】+【6】: Restore factory defaults

4) 【*】+【#】+Auto: Enter into the aging mode

6) 【*】+【#】+【4】: Menu set to English

8) 【#】+【#】+【0】: Switch the video format to 1080P60

10) 【#】+【#】+【2】: Switch the video format to 1080I60

12) 【#】+【#】+【4】: Switch the video format to 720P60

14) 【#】+【#】+【6】: Switch the video format to 1080P30

16) 【#】+【#】+【8】: Switch the video format to 720P30

3.2.2 Applications

Finishing initialization, it can receive and execute the IR commands. Press the remote controller button, the indicator light is flashing; release the button, the indicator light stops flashing. Users can control the pan/tilt/zoom, setting and running preset positions via the IR remote controller.

Key Instruction:

1. In this instruction, “press the key” means a click rather than a long-press, and a special note will be given if a long-press for more than one second is required.

2. When a key-combination is required, do it in sequence. For example, “【*】+【#】+【F1】” means press “【*】” first and then press “【#】” and last press “【F1】”.

1) Camera Selection

Select the camera address to control.

2) Pan/Tilt Control

Up: press 

Down press 

Left: press 

Right: press 

Back to middle position: press “【HOME】”

Press and hold the up/down/left/right key, the pan/tilt will keep running, from slow to fast, until it runs to the endpoint; the pan/tilt running stops as soon as the key is released.

3) Zoom Control

4) Focus Control

ZOOM IN: press "ZOOM ▼" key

ZOOM OUT: press "ZOOM ▲" key

Press and hold the key, the camera will keep zooming in or zooming out and stops as soon as the key is released.

Focus (near): Press "【focus+】" key (Valid only in manual focus mode)

Focus (far): Press "【focus-】" key (Valid only in manual focus mode)

Auto Focus: Support

Manual Focus: Support

Press and hold the key, the action of focus will keep continue and stops as soon as the key is released.

5) BLC Setting

BLC ON / OFF: support

6) Presets Setting, Running, Clearing

1. Preset setting: to set a preset position, the users should press the "【SET PRESET】" key first and then press the number key 0-9 to set a relative preset,

Note: 10 preset positions in total are available by remote controller.

2. **Preset Running:** Press a number key 0-9 directly to run a relative preset.

Note Action in vain if a relative preset position does not exist.

3. Preset clearing: to clear a preset position, the user can press the "【CLEAR PRESET】" key first and then press the number key 0-9 to clear the relative preset;

Note: press the "【#】" key three times continually to cancel all the presets.

7) Camera Remote Controller Address Setting

【*】+【#】+【F1】: Camera Address No.1

【*】+【#】+【F2】: Camera Address No. 2

【*】+【#】+【F3】: Camera Address No. 3

【*】+【#】+【F4】: Camera Address No. 4

3.3 MENU SETTING

3.3.1 Main Menu

In normal working mode, press **【MENU】** key to display the menu, using a scroll arrow to point at or highlight the selected items.

LANGUAGE: Language setting, Chinese / English

SETUP: System setting

CAMERA OPTION: Camera setting

PTZ OPTION: Pan tilt setting

VERSION: camera version setting

Restore Default: Reset setting

[↑↓] Select: for selecting the menu

[← →] Change Value: for modifying parameters

[MENU] Back: Press [MENU] to return

[Home] OK: Press [Home] to confirm

3.3.2 System Setting

Move the pointer to the (Setup) in the Main Menu, click the **【HOME】** key and enter into the (System Setting) as shown below,

PROTOCOL: VISCA/Pelco-P/Pelco-D/Auto

Visca ADDR: VISCA=1~7 Pelco-P=1~255 Pelco-D = 1~255

Baud rate: 2400/4800/9600/115200

Visca Address Fix: On/Off

3.3.3 Camera Setting

Move the pointer to the (CAMERA) in the Main Menu, click the 【HOME】 key and enter the (CAMERA) as follow,

EXPOSURE: Enter into Exposure setting

COLOR: Enter into color setting

Image: Enter into image setting

Focus: Enter into focus setting

Noise Reduction: Enter into noise reduction

1) EXPOSURE SETTING

Move the pointer to the (EXPOSURE) in the Main Menu, click the 【HOME】 and enter the (EXPOSURE SET) as follow,

Mode : Auto, Manual, Shutter priority, Iris priority and Brightness priority.

EV : On/Off (only available in auto mode)

Compensation Level: -7~7 (only available in auto mode when EV is ON)

BLC: ON/OFF for options (only available in auto mode)

Anti-Flicker: OFF/50Hz/60Hz for options (only available in Auto/Iris **priority**/Brightness **priority** modes)

Gain Limit: 0~15(only available in Auto/ Iris **priority** /Brightness **priority** mode)

WDR: Off,1~8

Shutter

Priority:1/25,1/30,1/50,1/60,1/90,1/100,1/120,1/180,1/250,1/350,1/500,1/1000,1/2000,1/3000,1/4000,1/6000,1/10000(only

available in Manual and Shutter priority mode)

IRIS Priority: OFF, F11.0, F9.6, F8.0, F6.8, F5.6, F4.8, F4.0, F3.4, F2.8, F2.4, F2.0, F1.8 (only available in Manual and Iris priority mode)

Brightness: 0~23 (only available in Brightness **priority** mode)

2) COLOR SETTING

Move the pointer to the (COLOR) in the Main Menu, click the **【HOME】** and enter the (COLOR SET) as follow,

COLOR	
=====	
WB Mode	Auto
Saturation	80%
Hue	7
AWB Sensitivity	High
Color style	Default
Color temp	Low

AF-Sensitivity	Low
[↑ ↓] Select [← →] Change Value	

Focus Mode: Auto, manual

AF-Zone: Up, middle, down

AF-Sensitivity: High, middle, low

5) NOISE REDUCTION

Move the pointer to the (NOISE REDUCTION) in the Menu, click the **【HOME】** and enter the (NOISE REDUCTION) as follow,

NOISE REDUCTION	
=====	
NR-2D	Auto
NR-3D	3
Dynamic Hot Pixel	OFF
[↑ ↓] Select [← →] Change Value	

2D Noise Reduction: Auto, close, 1~7

3D Noise Reduction: Close, 1~8

Dynamic Hot Pixel: Close, 1~5

3.3.4 P/T/Z

Move the pointer to the (P/T/Z) in the Main Menu, click the **【HOME】** and enter the (P/T/Z) as follow,

P/T/Z	
=====	
Depth of field	ON
Zoom speed	8
Image Freezing	OFF
Acc Curve	Slow
[↑ ↓] Select [← →] Change Value	

Depth of Field: Only effective for the remote controller, On/ Off;

When zooming in, the PT control speed by remoter will become slow),

Zoom Speed: Set the zoom speed for the remote controller, 1~8

Image Freezing: On/Off

Accelerating Curve: Fast/slow

3.3.5 Video Format

Move the pointer to the **(Video Format)** in the Menu, click the **【HOME】** and enter the **(Video Format)** as follow,

VIDEO FORMAT

=====

1080P60	1080P50
1080I60	1080I50
1080P30	1080P25
720P60	720P50
720P30	720P25
1080P59.94	1080I59.94
1080P29.97	720P59.94
720P29.97	

[↑ ↓]Select

[Menu]Back

Note: 1. S: 1080P60 Downward Compatibility; M: 1080P30 Downward Compatibility

2. Exit menu after modifying parameter to save it after powered off

1080P60, 1080P50、1080P30、1080P25、1080I60、1080I50、720P60、720P50、720P30、

720P25、1080P59.94、1080I59.94、1080P29.97、720P59.94、720P29.97 Optional

3.3.6 Version

Move the pointer to the **(VERSION)** in the Main Menu, click the **【HOME】** and enter the **(VERSION)** as follow,

VERSION

=====

MCU Version	2.0.0.15	2015-12-18
Camera Version	2.0.0.13	2015-12-18
 AF Version	 2.0.0.6	 2015-12-11
Lens	12X(20X)	

[Menu]Back

MCU Version: Display MCU version information

Camera Version: Display camera version information

AF Version: Display the focus version information

Lens: Display the lens zoom

3.3.7 Restore Default

Move the pointer to the **(RESTORE DEFAULT)** in the Main Menu, click the **【HOME】** and enter the **(RESTORE DEFAULT)** as follow,

RESTORE DEFAULT

Restore Default? NO

[↑ ↓] Select [← →] Change Value
 [Menu] Back [Home] OK

Restore default: options: yes/no; after restoring default, the video format won't be restored.

Note: If the address of former remoter is not 1 but another one from 2,3,4, the corresponding camera address will restore to 1 when all parameters or system parameters are restored. User should change the remoter address to be 1 (press No.1 according to the camera so to get normal operation)

4. Network Connection

4.1 Connecting Mode

Direct connection: Connect the camera and computer by network connecting cable.

Internet connection mode: Connect the camera to the Internet by Router or Switch and the user can log in to the device by the browser.

Note: Please do not put the power and network cable in places where can be easily touched to prevent video quality lowered by unstable signal transmission due to poor contact of cables.

The computer must have the network segment where the camera IP address belongs to. The device will not be accessible if without the segment. I.E. The camera default IP address is **192.168.5.163**, then segment 5 must be added to the computer. **Visca Port:** Set Visca port, the device will restart automatically after change (default **1259**; 0-65535 optional).

Specific steps are as below:

Firstly open the window of Local Area Connection Properties on the computer, select the "Internet Protocol version 4(TCP/IPv4)" as shown by the picture on the left. Double click or click the property "Internet" protocol version 4 (TCP/IPv4) to enter into the Internet Protocol Version 4(TCP/IPv4) Properties window, select "Advanced" to enter into the Advanced TCP/IP Setting and add IP and subnet mask in the IP browser as the picture is shown below. Click the "Confirm" to finish the adding of the IP segment. Users can add the corresponding network segment according to the revised IP address of the camera.

Note: The IP address to be added cannot be the same as that of other computers or devices. The existence of this IP address needs to be verified before adding.

Click the "Start" and select "Operation" to input cmd as the picture below to verify if the network segment has been successfully added.

Click "OK" and open the DOS command window, input ping 192.168.5.26 and press Enter key, it will show the message as below: which means network segment adding is succeeded.

Users can verify network connection as steps above mentioned after the finish of the camera self-check. If IP is the default, open the DOS command window and input 192.168.5.163, then press Enter key. It will show the message as below: which means network connection is normal.

4.2 IE Log In

4.2.1 Web client

1) Web client Log In

Input the IP address 192.168.5.163 of the device in the address field of browser and click Enter button to enter into Web Client login page as below picture. User can log in as administrator and normal user. If login as the administrator (Default User name/Password: admin), users can preview, playback, configuration and cancel in the Web Client; If login in as normal user(Default User name/Password:user1 or user2), users can only preview, playback and cancel, no option for configuration.

Note: Web access supported browsers: IE,360 browsers, and other conventional browsers.

2)Download/Install Plugin

When first using the IE browser to access the web conferencing camera, the login page will appear "Playback plug-in is not installed, please download and install!". Click on this message, download, and install MRWebXinstall.exe, according to information prompts.

After installing the plug, enter user name and password, click and Sign (initial default user name and password: "admin", users can change the user name and password on their own after entering) into the Web client management interface.

4.2.2 Preview

After successful login into the management interface, it enters the video preview interface. In the preview screen, users can control PTZ, zoom, focus, video capture, sound, focus, full screen, and set the preset position, run, delete, and other operations.

You can record the video and save it on SD Card when SD Card built-in. Video can be saved on the Computer at Local.

1) Login as administrator

User name, password, the default admin

PTZ control can be carried out, zoom, focus, video capture, sound, zoom, full screen and set the preset position, run, and delete; you can preview, playback, configuration, log off.

2) Log in as a normal user

Default User name/password: user1 or user2

PTZ control can be carried out, zoom, focus, video capture, sound, zoom, full screen and set the preset position, un, and delete; you can preview, playback, and log off.

NOTE: There is no configuration right for normal user login.

4.2.3 Playback

1) Playback video files

First, please record, snapshot, and save the file when previewing. Click "Playback" to enter the recording file and picture files playback page, and then select the file "Video File" and click Search, and search out the video file, click Play to play the video file.

2) Playback picture files

First, please record, snapshot, and save the file when previewing. Click "Playback" to enter the recording file and picture files playback page, and then select the file "Image File" and click Search, and search out the video file, click Play to play the image file.

4.2.4 Configuration

Click **Configuration** to enter into the device parameters setting page

There are the following options: Local configuration, audio configuration, video configuration, network configuration, PTZ configuration, internet access configuration, system configuration, detailed description see the following table.

Menu	Explanation
Local configure	Including video preview mode, record video packing time, record video storage route settings, etc.
Audio configure	Including audio compressing format, sampling frequency, sampling precision, compressing code rate settings, etc.
Video configure	Including video encoding, video parameters, character-overlapping, character size, video output setting etc.
Network configure	Including basic parameters, Ethernet, DNS, wireless network setting, GB28181, etc.
System configure	Including equipment property, system time, user management, version update, Reset, Reboot device settings etc.

1) Local configuration

Video Preview Mode: The user can choose real-time priority or fluency priority: The delay will be small when under real-time priority mode and fluency will be good when under fluency priority mode. Setting based on the user need (Default value: real-time normal (2), real time best (1), fluency normal (3), fluency good (4) and fluency best (5))

Recording packing time(minute): Set recording video packing time (default is 10, range from 1~120 minutes)

Recording/Snapshot file storage route: Set a local recording video/snapshot file storage route. (Default D:\MyIPCam\)

Click the **Save** button to make settings effective.

2) Audio Configuration

Switch: Choose to enable the audio or not.

Compressing format: Set audio compressing format and the device will reboot automatically after change (default MP3, PCM, AAC optional)

Sampling frequency: Set sampling frequency and the device will reboot automatically after change (default 44100, 16000, 32000 and 48000 optional)

Sampling precision: Set sampling precision (default 16bits)

Compressing code rate: Set audio compressing code rate (default 64bits,32,48,96,128bits optional)

Note Click "SAVE", it will remind "Enable has changed. Restart the device to take effect after the success of the save.", then please reboot the camera to make a new setting effect.

4.2.5 Video configuration

1) Video encoding

Code stream: Stream: Different video output mode setting, use different streams. (Main stream, secondary stream)

Compression Format: Set the video compression format, save and reboot to take it effect (primary / secondary stream default: H.264, H.265 optional)

Profile: Profile Mode Setting (Default HP, BP, MP Optional)

Video Size: Set video image resolution, save and reboot to take it effect (main stream default 1920 * 1080 or 1280 * 720 optional; default secondary stream 640 * 320, 320 * 180, 1280 * 720, 1920 * 1080 optional)

Stream Rate control: Set rate control mode, save and reboot to take it effect (Primary / secondary stream default variable bit rate, fixed rate is for option).

Image Quality: Set the image quality, image quality can be changed only when rate control is variable bit rate, (main stream defaulted is better, secondary stream default is not good, there are best, better, good, bad, worse, worst for options).

Rate (Kb / s): Set the video bit rate (main stream default 4096Kb / s, 64-12288Kb / s optional; secondary stream default 1024Kb / s, 64-10240Kb / s optional).

Frame rate (F / S): Set the video frame rate (primary / secondary stream default 25F / S, primary stream 5-60F / S optional, secondary stream 5-30F / S optional).

Key frame interval: Set the key frame interval (primary / secondary stream default 75F, primary / stream 1-300F optional. secondary stream 1-150F optional).

Stream Name: When streaming via rtsp or rtmp, user can modify stream name. Main Stream(live/av0), sub stream(live/av1)

Click the "Save" button to display the "saved successfully" message, then settings take effect.

2) Stream Release

Switch: To turn on/off the main / secondary stream.

Protocol: primary / secondary stream applies RTMP protocol.

Host Port: server port number (default 1935, 0-65535 optional)

Host Address: server IP addresses (default 192.168.5.11)

Stream Name: choose a different stream name (live / av0, live / av1 optional).

User: Set the user name.

Password: Set the password.

Click on the "Save" button to display the "Save successful" message, then settings take effect.

Method of obtaining RTSP: RTSP: // device IP address: 554 / live / av0 (av0 mainstream; av1 secondary stream)

3) RTP Broadcasting

Main/Sub Stream: On/off;

Protocol: RTP or TS

Address: Default 224.1.2.3. It can be edited.

Port: Main Stream Default Port: 4000, Sub Stream Default Port: 4002

Visit: Address comes up after setting. Eg: RTP://224.1.2.3:4000; udp://@224.1.2.3:4000;

3) Video Parameters

a Focus: Focus mode, focus range, focus sensitivity can be set.

Focus Mode: set the focus mode (the default auto, manual optional)

Focus range: set the focus range (the default middle, the upper and lower optional)

Focus Sensitivity: Set the focus sensitivity (default is low, high, medium optional)

b, Exposure: Exposure mode, exposure compensation, back light compensation, anti-flicker, gain limit, wide dynamic, shutter speed, aperture value and brightness can be set.

Exposure Mode: Set the exposure mode (the default automatic, manual, shutter priority, aperture priority, Brightness priority optional)

Exposure compensation: Exposure compensation setting is active when it is auto status (default is off).

Exposure compensation value: Set the exposure compensation value, valid when it is set for auto (default 0, -7 to 7 optional).

BLC: Set back light compensation, valid when it is auto status (default is off).

Anti-flicker: Set up anti-flicker mode, valid when status of automatic, aperture or brightness priority (default 50Hz, closed, 60Hz optional).

Gain limit: set the gain limits, auto, active when it is status of aperture or brightness priority (default 3, 0-15 optional).

Dynamic range: set the dynamic range (default 5, 0-8 optional).

Shutter speed: active when it is status of manual or shutter-priority (default

1/100, 1/25, 1/30, 1/50, 1/60, 1/90, 1/100, 1/120, 1/180, 1/250, 1/350, 1/500, 1/1000, 1/2000, 1/3000, 1/4000, 1/6000, 1/10000 optional).

Aperture value: Set the aperture value, active when it is status of manual or aperture-priority (default F1.8, closed, F11, F9.6, F8.0, F6.8, F5.6, F4.8, F4.0, F3.4, F2.8, F2.4, F2.0, F1.8 optional).

Brightness: Set the brightness value, active when it is a state of brightness priority (default 7, 0-23 optional).

c, Color: White balance, saturation, color, white balance, sensitivity, color temperature, gain red and blue gain can be set.

White balance modes: Set the white balance mode (the default automatic, 3000K, 4000K, 5000K, 6500K, manual, One-push optional). Note: Click the "Correction" button when selected the One-push white balance mode.

Saturation: Set the saturation (default 80%, 60%, 70%, 80%, 90%, 100%, 110%, 120%, 130%, optional).

Auto white balance Sensitivity: Sensitivity Auto white balance settings (default is low, high, medium optional).

Chroma: Set the chrome (default 7, 0-14 optional).

Color Temperature: set color temperature (Default setting: High, with low, middle for options)

Red Gain: Set the red gain, effective when it is manual (default 255, 0-255 optional).

Blue Gain: Sets the Blue gain, effective when it is manual (default 199, 0-255 optional).

d, Image: Brightness, contrast, sharpness, black and white mode, the gamma curve, Horizontal Flip, and Vertical Flip can be set.

Brightness: Set the brightness (default 6, 0-14 optional).

Contrast: set the contrast (default 8, 0-14 optional).

Sharpness: Set the sharpness value (default 7, 0-15 optional).

Black and white mode: Set black and white mode (default color, black/white optional).

Gamma: Gamma value setting (default 0.45, 0.50, 0.52, 0.55 optional).

Flip Horizontal: Set Flip Horizontal (default Off, On optional).

Flip Vertical: Set vertical flip (default Off, On optional).

e. Noise Reduction: 2D noise reduction, 3D noise reduction, and dynamic dead pixel correction available.

2D Noise Reduction: Set 2D noise reduction level (default Auto, 1-7, and Off optional).

3D Noise Reduction: Set 3D noise reduction level (default 5, 1-8 and Off optional).

Dynamic dead pixel correction: Set Dynamic dead pixel correction (default Off, 1-8 optional).

Note: Click "Refresh" to make a revision of any video parameters of a, b, c, d, e effective.

4) Character-Overlapping

Display date and time: Set whether to display the time and date (default display).

Display Title: Set whether to display the title (default display).

Font Color of Time: Set font color of time and date (default white, black, yellow, red, blue optional).

Font Color of Title: Set font color of title (default white, black, yellow, red, blue optional).

Moving characters: Set the display position of moving date, time and title, click on the "up, down, left, right" buttons to move the corresponding character position.

Title Content: Set title content (default CAMERA1).

Time Content: Set time content (default 1970/01/10 05:36:00)

Click on the "Save" button and display the "Save successful" message, then valid

5) Character Size

Mainstream character size: Set the character size of the display, the device will restart automatically after changed and saved (default 24, 24, 16 optional)

Secondary stream character size: Set the character size of the display, the device will restart automatically after changed and saved (default 16, 24, 16 optional)

Click on the "Save" button to display "Parameter saved successfully" message, set to take effect

6) Video output

Output Format: Set the video output format (default

1080P60, 1080P50, 1080P30, 1080P25, 1080I60, 1080I50, 720P60, 720P50, 720P30, 720P25, 1080P59.94, 1080I59.94, 1080P29.97, 720P59.94, 720P29.97.

Click on the "Save" button, it will be valid when display "Save successful".

7) USB subtitle

Display subtitles: Check the box (after checking, USB video output is displayed on the screen caption content)

Font color: Default white, black, Yellow, red, blue optional

Subtitle: Users can fill in their own

Ticker: according to the user demand, down, left and right to move the display position of subtitles

4.2.6 Network configuration

1) Network port

Data port: set the data port, the device will restart automatically after changed (default 3000, 0-65535 optional).

Web Port: Set Web port, the device will restart automatically after changed (default is 80, 0-65535 is optional).

Onvif Port: Set Onvif port,the device will restart automatically after changed(default 2000,0-65535 optional).

Soap Port: Set Soap port (default 1936,0-65535 optional).

RTMP Port: Set RTMP port (default 1935,0-65535 optional).

RTSP Port: Set RTSP port,the device will restart automatically after changed (default 554,0-65535 optional).

Visca Port: Set Visca port,the device will restart automatically after changed (default 1259,0-65535 optional). Click on the "Save" button,it will be valid when display "Save successful".

RTMP access: RTMP: // equipment IP address: 1935 / live/av0 (av0 main stream; av1 second stream)

RTMP Access: `rtmp://equipment IP address: 1935 / live/av0 (av0 main stream; av1 second stream)`

2) Ethernet parameters

DHCP: Enable or disable obtain IP automatically can be set. Save changes and reboot the device to takes effect (Default: OFF)

IP Address: Set the IP address, save changes, and reboot the device to takes effect (default 192.168.5.163).Note: This IP address is the same as the one used to login to the Web page.

Subnet Mask: Set the subnet mask (default 255.255.255.0).

Default Gateway: Set the default gateway (default 0.0.0.0).

Physical Address: Set the physical address (the parameter is read-only but can not be modified).

Click on the "Save" button, it will be valid when display "Save successful". (Note: To prevent IP conflicts When modifying).

3) DNS parameters

Preferred DNS server: set the preferred DNS server. (Default 0.0.0.0).

Alternate DNS server: Alternate DNS server settings. (Default 0.0.0.0).

Click on the "Save" button, it will be valid when display "Save successful".

4) GB28181

Switch: set whether open GB28181, can check

Time Synchronization: whether synchronization time is set, you can check

Stream Type: stream typesetting (the default mainstream, secondary stream optional)

Sign effective time (in seconds): 3600 Range 5-65535

Heartbeat time (seconds): 60 Range 1-65535

Register ID: 34020000001320000001

Register User name: IPC

Register Password: 12345678

Equipment ownership: Users can add their own

Administrative regions: Users can add their own

Alarm Zone: Users can add their own

Equipment installation address: Users can add their own

Local SIP Port: 5060 Range 0-65535

GB28181 Server Address: IP address of the computer

Server SIP Port: 5060 Range 0-65535

Server ID: 34020000002000000001

Click on the "Save" button, it will be valid when display "Save successful".

4.2.7 System configuration

1) Device Properties

Device Name: Set the device name (the default Camera1, user can add their own).

Device ID: Set the device ID (default 1, Read-Only).

System Language: Set the system language (default Simplified Chinese, English optional).Need to re-login after modify and save the setting.

Click on the "Save" button, it will be valid when display "Save successful".

2) System Time

Date Format: Set the date format (YYYY-MM-DD default That year - month - day, MM-DD-YYYY namely Month - Day - Year, DD-MM-YYYY date - month - year Optional).

Date separator: set the date separator (default '/', '-', ' ' Optional).

Time Zone: Set the time zone (default East eight districts, other time zones optional).

Time Type: Set the time types (default 24 hours, optional 12 hours).

Time setting: Set time mode (to choose the computer time synchronization, NTP server time synchronization, or set manually).

Computer Time: Set the computer synchronization valid.

Update interval: Set the NTP server automatic updated time interval.Valid after setting NTP server synchronization (the default one day,2-10 days Optional).

NTP server address or domain name: Set NTP server address or domain name (default time.nits.gov). Valid after setting NTP server synchronization.

NTP Server Port: Sets the NTP server port (default 123).Valid after setting NTP server synchronization.

Set the time manually, Effective when setting manually.

Click on the "Save" button, it will be valid when display "Save successful".

3) User Management

Select users: Set the user type (the default administrator,Common User 1,Common User 2 optional)

User name: set the user name (Select User Administrator default admin; select a common user1 default user1; to select a common user 2 default user2; the user can modify their own)

Password: Set a password(Select User Administrator default admin; select a common user1 default user1; to select a common user 2 default user2; the user can modify their own).

Password confirmation: Confirm the input passwords are the same or not.

Click on the "Save" button to display the "Save successfully" message, then the set is to take effect.

Note: Please note the case-sensitivity of the user name and password.

If login page by a common user's name and password, one does not have configuration privileges but can only operate to preview, playback, logoff.

4) Version upgrade

MCU version V2.0.0.16 2015-12-18

Camera version V2.0.0.16 2015-12-18

Focus version V2.0.0.6 2015-12-11

Users only read the version information above which is consistent with the menu version but can not modify. Different types of machines have different information.

Update file:

Click "Browse ..." installation, to select the upgrade file in the pop-up window.

Click on the "Upgrade" button, the upgrade dialog will appear. the device will reboot automatically after the update successfully.

(Note: make sure the power and network are keeping connected during the process. or the upgrade will fail)

Note: After the version upgrade is complete, you need to restore factory defaults; a, through web to restore the factory default configuration; b, through the recovery menu; c, remote control shortcut * # 6;

Choose one of the above three ways. I chose the IP accounts, passwords also need to be restored to the default.

5) Restore factory setting

Click on the pop-up "Restore Factory Defaults" button and choose "yes" or "no", then the device will restart automatically and restore the factory setting.

6) Reboot

Click on the pop-up "Reboot" button and choose "yes" or "no", then the device will restart automatically

4.2.8 Logout

Point "Logout" pop-up "Confirmation" dialog; select "Yes" or "No", choose "Yes" to exit the current page and return to the user login interface again.

4.2.9 Wireless network

If the user's equipment has a wireless network module, Web page "Network Configuration" has "Wireless Network" configuration page, the specific configuration is as follows:

1) Network settings

Wireless network configuration:

Network interface enables: can check, to set the following items after checked.

DHCP: can check, if check, it can obtain IP automatically.

IP address: set wireless WIFI IP(default 192.168.1.250, if checked DHCP, IP could be assigned automatically)

Note: wireless IP address can not be in the same segment with a wired IP address.

Subnet Mask: Set the wireless IP subnet mask (default 255.255.255.0)

Default Gateway: Set the wireless IP default gateway (default 192.168.1.1)

SSID: The user can modify their own (the default-test)

Encryption: can check, the password can be set after checked.

Password: can set a password, the password can be changed if only checked encryption.

Click on the "Save" button to display "Parameter saved successfully" message, set to take effect

Note: SSID and password should be filled in correctly, otherwise, if restarted after the powered off, the wireless WiFi connection is not successful.

2) WiFi hotlink

Click on the "search" button to search the WIFI hotspot.

Double-click the dialog box after searched the user WIFI hotspot, and then input a password to connect WIFI. It connected successfully after shown the "successful connect" window.

3) Wireless WiFi log in page

If you do not check the above configuration DHCP (automatically obtain IP), then open the browser, enter the wireless network IP address in the address bar (default 192.168.1.250), press Enter to log construction; If you checked DHCP, then you obtain IP automatically, just login specific router or switch user interface settings to view the allocation of IP address.

5. Serial Communication Control

Under common working conditions, the camera can be controlled through RS232/RS485 interface(VISCA), RS232C serial parameter are as follows:

Baud rate: 2400/4800/9600/115200 bits / sec; Start bit: 1; data bits: 8; Stop bit: 1; Parity: None.

After power on, the camera first goes left, then back to the middle position. Self-test is finished after the zoom moved to the farthest and then back to the nearest position. If the camera saved 0 preset before, it will be back to that position after initialization. At this point, the user can control the camera by the serial commands.

5.1 VISCA protocol list

5.1.1 Camera return command

Ack/Completion Message		
	Command packet	Note
ACK	z0 41 FF	Returned when the command is accepted.
Completion	z0 51 FF	Returned when the command has been executed.

z = camera address + 8

Error Messages		
	Command packet	Note
Syntax Error	z0 60 02 FF	Returned when the command format is different or when a command with illegal command parameters is accepted
Command Not Executable	z0 61 41 FF	Returned when a command cannot be executed due to current conditions. For example, when commands controlling the focus manually are received during autofocus.

5.1.2 Camera control command

Command	Function	Command packet	Note
AddressSet	Broadcast	88 30 0p FF	p: Address setting
IF_Clear	Broadcast	88 01 00 01 FF	I/F Clear
CommandCancel		8x 21 FF	
CAM_Power	On	8x 01 04 00 02 FF	Power ON/OFF
	Off	8x 01 04 00 03 FF	
CAM_Zoom	Stop	8x 01 04 07 00 FF	p = 0(low) - F(high)
	Tele(Standard)	8x 01 04 07 02 FF	
	Wide(Standard)	8x 01 04 07 03 FF

6. Camera Maintenance and Troubleshooting

6.1 Camera Maintenance

- 1) If the camera is not used for a long time, please turn off the power adapter switch and AC plug.
- 2) Use soft cloth or tissue to clean the camera cover.
- 3) Use a soft cloth to clean the lens; Use neuter cleanser if bad smeared. No use strong or corrosive cleanser or corrosive cleanser avoiding scuffing.

6.2 Troubleshooting

1) No video output

- a, Check whether the camera power supply is connected, the voltage is normal, the power indicator is lit.
- b, Whether the machine could do self-inspection after restarted.
- c, Check whether the bottom of the DIP switch is the normal operating mode
- d, Check whether the video output cable or video display is normal

2) No image sometimes

- a, Check whether the video output cable or video display is normal

3) Image dithering when zoom-in or zoom-out

- a, Check whether the camera installation position is solid
- b, Whether there is a shaking machine or objects around the camera

4) The remote controller can not work

- a Remote control address is set to 1 (if the machine is set back to the factory defaults, remote control addresses need to be back to 1 too)
- b, Check whether the battery is installed on the remote controller or low.
- c, Check the camera working mode is the normal operating mode (see Table 2.2 and Table 2.3)
- d, Check the menu whether it is closed, camera control through the remote controller is only available after exiting the menu. If video output from LAN, the menu will not be displayed, the menu will automatically exist in the 30s later, then it can be controlled by a remote controller.

5) The serial port can not work.

- a, Check whether the camera serial device protocol, baud rate, address is consistent
- b, Check whether the control cable is connected properly
- c, Check whether the camera working mode is the normal operating mode (see Table 2.2 and Table 2.3)

6) Web pages can not log in

- a, Check whether the camera is showing normally.
- b, Check whether the network cable is connected properly (Ethernet port yellow light flashes to indicate normal network cable connection)
- c, Check whether your computer is added the segment and the segment is consistent with the IP address of the camera
- d, Click "Start" and select "Run" and then type "cmd" in the computer; Click "OK" then turn on a DOS command window to enter

ping 192.168.5.163. Press the Enter key to appear message as follows: Description network connection is normal

7. WARRANTY

1. Limited warranty in respect of Alfatron Products Only

1.1 This limited warranty covers defects in materials and workmanship in this product.

1.2 Should warranty service be required, proof of purchase must be presented to the Company. The serial number on the product must be clearly visible and not have been tampered with in any way whatsoever.

1.3 This limited warranty does not cover any damage, deterioration or malfunction resulting from any alteration, modification, improper or un reasonable use or maintenance, misuse, abuse, accident, neglect, exposure to excess moisture, fire, improper packing and shipping (such claims must be presented to the carrier), lightning, power surges, or other acts of nature. This limited warranty does not cover any damage, deterioration or malfunction resulting from the installation or removal of this product from any installation, any unauthorized tampering with this product, any repairs attempted by anyone unauthorized by the Company to make such repairs, or any other cause which does not relate directly to a defect in materials and/or workmanship of this product. This limited warranty does not cover equipment enclosures, cables or accessories used in conjunction with this product.

This limited warranty does not cover the cost of normal maintenance. Failure of the product due to insufficient or improper maintenance is not covered.

1.4 The Company does not warrant that the product covered hereby, including, without limitation, the technology and/or integrated circuit(s) included in the product, will not become obsolete or that such items are or will remain compatible with any other product or technology with which the product may be used.

1.5 Only the original purchaser of this product is covered under this limited warranty. This limited warranty is not transferable to subsequent purchasers or owners of this product.

1.6 Unless otherwise specified, the goods are warranted in accordance with the manufacturer's product specific warranties against any defect attributable to faulty workmanship or materials, fair wear and tear being excluded.

1.7 This limited warranty only covers the cost of faulty goods and does not include the cost of labor and travel to return the goods to the Company's premises.

1.8 In the event of any improper maintenance, repair or service being carried out by any third persons during the warranty period without the Company's written authorization, the limited warranty shall be void.

1.9 A 7 (seven) year limited warranty is given on the aforesaid product where used correctly according to the Company's instructions, and only with the use of the Company's components.

1.10 The Company will, at its sole option, provide one of the following three remedies to whatever extent it shall deem necessary to satisfy a proper claim under this limited warranty:

1.10.1 Elect to repair or facilitate the repair of any defective parts within a reasonable period of time, free of any charge for the necessary parts and labour to complete the repair and restore this product to its proper operating condition.; or

1.10.2 Replace this product with a direct replacement or with a similar product deemed by the Company to perform substantially the same function as the original product; or

1.10.3 Issue a refund of the original purchase price less depreciation to be determined based on the age of the product at the time remedy is sought under this limited warranty.

1.11 The Company is not obligated to provide the Customer with a substitute unit during the limited warranty period or at any time thereafter.

1.12 If this product is returned to the Company this product must be insured during shipment, with the insurance and shipping charges prepaid by the Customer. If this product is returned uninsured, the Customer assumes all risks of loss or damage during shipment. The Company will not be responsible for any costs related to the removal or re-installation of this

product from or into any installation. The Company will not be responsible for any costs related to any setting up this product, any adjustment of user controls or any programming required for a specific installation of this product.

1.13 Please be aware that the Company's products and components have not been tested with competitor's products and therefore the Company cannot warrant products and/or components used in conjunction with competitor's products.

1.14 The appropriateness of the goods for the purpose intended is only warranted to the extent that the goods are used in accordance with the Company's installation, classification and usage instructions.

1.15 Any claim by the Customer which is based on any defect in the quality or condition of the goods or their failure to correspond with specification shall be notified in writing to the Company within 7 days of deliver or (where the defect or failure was not apparent on reasonable inspection by the Customer) within a reasonable time after discovery of the defect or failure, but, in any event, within 6 months of delivery.

1.16 If delivery is not refused, and the Customer does not notify the Company accordingly, the Customer may not reject the goods and the Company shall have no liability and the Customer shall pay the price as if the goods had been delivered in accordance with the Agreement.

1.17 THE MAXIMUM LIABILITY OF THE COMPANY UNDER THIS LIMITED WARRANTY SHALL NOT EXCEED THE ACTUAL PURCHASE PRICE PAID FOR THE PRODUCT.
