

# System 20 PRO

---

2.4 GHz Wireless System

**IP Control Specifications (Document Version: 0.0.5)**

# Table of Contents

1	Preface .....	11
1.1	Purpose of This Document .....	11
1.1.1	Definitions of Terms and Numeric Representation .....	11
2	Basic Specifications .....	12
2.1	Communication Interfaces .....	12
2.1.1	RX Communication Interface.....	12
2.2	Command Formats .....	12
2.2.1	Command Common Rules .....	12
2.2.2	Get Command / Set Command / Request Command.....	13
2.2.3	ACK.....	13
2.2.4	NAK.....	14
2.2.5	Answer.....	16
2.2.6	Information.....	16
2.3	TCP Communications .....	17
2.3.1	Communication Control.....	17
2.3.2	Communication Start .....	18
2.3.3	Control Sequence .....	18
2.3.4	Communication Errors.....	21
2.3.5	End of Communication .....	22
2.4	UDP Communications.....	22
2.4.1	Communication Control.....	22
2.4.2	Communication Start .....	22
2.4.3	Control Sequence .....	22
2.4.4	Communication Errors.....	22
2.4.5	End of Communication .....	22
3	Command Overview.....	23
3.1	Command List .....	23
4	Command Details.....	37
4.1	Management .....	37
4.1.1	Model Name Acquisition .....	37
4.1.2	Version Information Acquisition .....	38
4.1.3	Device Name Acquisition.....	40
4.1.4	Device Name Setting .....	41
4.1.5	Device Name Change Notification .....	41
4.1.6	Device ID Acquisition .....	42
4.1.7	Device ID Setting .....	43
4.1.8	Device ID Change Notification .....	43
4.1.9	System20 ID Acquisition .....	44

4.2	Control Setting .....	45
4.2.1	Auto Lock ON/OFF Setting Acquisition .....	45
4.2.2	Auto Lock ON/OFF Setting .....	46
4.2.3	Auto Lock ON/OFF Setting Change Notification .....	46
4.2.4	AF Meter Setting Acquisition .....	47
4.2.5	AF Meter Setting .....	48
4.2.6	AF Meter Setting Change Notification .....	48
4.2.7	Jog Dial Direction Setting Acquisition .....	49
4.2.8	Jog Dial Direction Setting .....	50
4.2.9	Jog Dial Direction Setting Change Notification .....	50
4.3	Network Setting .....	51
4.3.1	Network Information Acquisition .....	51
4.3.2	Network Information Setting .....	52
4.3.3	Network Information Setting Change Notification .....	53
4.3.4	Notification Mode Acquisition .....	53
4.3.5	Notification Mode Setting .....	54
4.3.6	Notification Mode Setting Change Notification .....	55
4.3.7	Level Notification ON/OFF Acquisition .....	55
4.3.8	Level Notification ON/OFF Setting .....	56
4.3.9	Level Notification ON/OFF Setting Change Notification .....	57
4.3.10	Level Notification Intervals Acquisition .....	57
4.3.11	Level Notification Intervals Setting .....	58
4.3.12	Level Notification Intervals Setting Change Notification .....	59
4.3.13	Multicast Address Acquisition .....	59
4.3.14	Multicast Address Setting .....	60
4.3.15	Multicast Address Setting Change Notification .....	61
4.3.16	Multicast Port Acquisition .....	61
4.3.17	Multicast Port Setting .....	62
4.3.18	Multicast Port Setting Change Notification .....	63
4.3.19	Syslog Setting Acquisition .....	63
4.3.20	Syslog Setting Change .....	64
4.3.21	Syslog Setting Change Notification .....	65
4.3.22	NTP ON/OFF Setting Acquisition .....	65
4.3.23	NTP ON/OFF Setting Change .....	66
4.3.24	NTP ON/OFF Setting Change Notification .....	67
4.3.25	NTP Server Address Acquisition .....	67
4.3.26	NTP Server Address Setting .....	68
4.3.27	NTP Server Address Change Notification .....	68
4.3.28	NTP Server Port Acquisition .....	69
4.3.29	NTP Server Port Setting .....	70

4.3.30	NTP Server Port Change Notification .....	70
4.3.31	NTP Time Zone Setting Acquisition .....	71
4.3.32	NTP Time Zone Setting .....	72
4.3.33	NTP Time Zone Setting Change Notification .....	72
4.3.34	DST ON/OFF Setting Acquisition .....	73
4.3.35	DST ON/OFF Setting .....	74
4.3.36	DST ON/OFF Setting Change Notification .....	74
4.3.37	DST Date and Time Setting Acquisition .....	75
4.3.38	DST Date and Time Setting .....	76
4.3.39	DST Date and Time Setting Change Notification .....	77
4.4	Communication Setting .....	77
4.4.1	RF Mode Acquisition .....	77
4.4.2	RF Mode Setting .....	78
4.4.3	RF Mode Change Notification .....	79
4.4.4	MultiTx ON/OFF Setting Acquisition .....	79
4.4.5	MultiTx ON/OFF Setting .....	80
4.4.6	MultiTx ON/OFF Setting Change Notification .....	81
4.4.7	Pairing Status Change Notification .....	81
4.4.8	Pairing Request .....	82
4.4.9	Pairing Cancel Request .....	83
4.4.10	Multipairing ID Acquisition .....	83
4.4.11	Multipairing ID Change Notification .....	84
4.4.12	Multipairing ID Deletion Request .....	85
4.5	Audio .....	86
4.5.1	Mixout ON/OFF Setting Acquisition .....	86
4.5.2	Mixout ON/OFF Setting .....	87
4.5.3	Mixout ON/OFF Setting Change Notification .....	87
4.5.4	OutputType Acquisition for Each Ch .....	88
4.5.5	OutputType Setting for Each Ch .....	89
4.5.6	OutputType Change Notification for Each Ch .....	89
4.5.7	Volume Acquisition for Each Ch .....	90
4.5.8	Volume Setting for Each Ch .....	91
4.5.9	Volume Change Notification for Each Ch .....	91
4.5.10	HPF Setting Acquisition for Each Ch .....	92
4.5.11	HPF Setting for Each Ch .....	93
4.5.12	HPF Setting Change Notification for Each Ch .....	93
4.5.13	Mixout ON/OFF Setting Acquisition for Each Ch .....	94
4.5.14	Mixout ON/OFF Setting for Each Ch .....	95
4.5.15	Mixout ON/OFF Setting Change Notification for Each Ch .....	95
4.5.16	Mixout Volume Setting Acquisition for Each Ch .....	96

4.5.17	Mixout Volume Setting for Each Ch.....	97
4.5.18	Mixout Volume Setting Notification for Each Ch.....	97
4.5.19	Mixout OutputType Setting Acquisition.....	98
4.5.20	Mixout OutputType Setting .....	99
4.5.21	Mixout OutputType Setting Change Notification .....	99
4.5.22	Limiter Setting Acquisition .....	100
4.5.23	Limiter Setting.....	101
4.5.24	Limiter Setting Change Notification .....	101
4.5.25	Mute Setting Acquisition for Each Ch .....	102
4.5.26	Mute Setting for Each Ch .....	103
4.5.27	Mute Setting Change Notification for Each Ch.....	103
<b>4.6</b>	<b>TX.....</b>	<b>104</b>
4.6.1	TX Connection Status Acquisition .....	104
4.6.2	TX Connection Status Notification.....	105
4.6.3	TX Model Name Acquisition .....	105
4.6.4	TX Identify Request .....	106
4.6.5	TxID Acquisition.....	107
4.6.6	TxID Setting .....	108
4.6.7	TxID Change Notification.....	109
4.6.8	TX Gain Setting Acquisition .....	109
4.6.9	TX Gain Setting .....	110
4.6.10	TX Gain Setting Change Notification.....	111
4.6.11	TX MIC/INST Setting Acquisition.....	111
4.6.12	TX MIC/INST Setting .....	112
4.6.13	TX MIC/INST Setting Change Notification .....	113
4.6.14	TX MuteMode Setting Acquisition .....	113
4.6.15	TX MuteMode Setting .....	114
4.6.16	TX MuteMode Setting Change Notification .....	116
4.6.17	TX LED Mode Acquisition .....	116
4.6.18	TX LED Mode Setting .....	117
4.6.19	TX LED Mode Change Notification .....	118
4.6.20	TX Battery Type Acquisition.....	118
4.6.21	TX Battery Type Setting.....	119
4.6.22	TX Battery Type Change Notification .....	120
4.6.23	TX Pairing Timeout Time Acquisition.....	121
4.6.24	TX Pairing Timeout Time Setting .....	122
4.6.25	TX Pairing Timeout Time Change Notification .....	122
4.6.26	TX System20 ID Acquisition .....	123
4.6.27	TX Version Acquisition .....	124
4.6.28	TX Factory Reset Request .....	125

4.6.29	TX Reboot Request .....	125
4.6.30	TX External Mute Acquisition.....	126
4.6.31	TX External Mute Setting.....	127
4.6.32	TX External Mute Change Notification .....	127
4.6.33	TX External Mute LED Display Setting Acquisition .....	128
4.6.34	TX External Mute LED Display Setting.....	129
4.6.35	TX External Mute LED Display Setting Change Notification.....	129
4.6.36	TX Mute Status Acquisition.....	130
4.6.37	TX Mute Status Change Notification .....	131
4.6.38	TX Battery Level Acquisition.....	131
4.6.39	TX Battery Level Change Notification .....	133
<b>4.7</b>	<b>EQ .....</b>	<b>134</b>
4.7.1	EQ ON/OFF Setting Acquisition .....	134
4.7.2	EQ ON/OFF Setting.....	135
4.7.3	EQ ON/OFF Setting Change Notification .....	135
4.7.4	EQ ON/OFF Setting Acquisition for Each Band .....	136
4.7.5	EQ ON/OFF Setting for Each Band.....	137
4.7.6	EQ ON/OFF Setting Change Notification for Each Band.....	137
4.7.7	EQ Gain Setting Acquisition for Each Band .....	138
4.7.8	EQ Gain Setting for Each Band.....	139
4.7.9	EQ Gain Setting Change Notification for Each Band .....	139
4.7.10	EQ Frequency Setting Acquisition for Each Band.....	140
4.7.11	EQ Frequency Setting for Each Band .....	141
4.7.12	EQ Frequency Setting Change Notification for Each Band .....	141
4.7.13	EQ Q Setting Acquisition for Each Band .....	142
4.7.14	EQ Q Setting for Each Band.....	143
4.7.15	EQ Q Setting Change Notification for Each Band .....	144
4.7.16	EQ Filter Type Setting Acquisition for Each Band .....	144
4.7.17	EQ Filter Type Setting for Each Band .....	145
4.7.18	EQ Filter Type Setting Change Notification for Each Band.....	146
4.7.19	Last Recalled EQ Preset Acquisition.....	147
4.7.20	Last Recalled EQ Preset Setting .....	148
4.7.21	Last Recalled EQ Preset Setting Change Notification .....	148
4.7.22	EQ Preset Recall Request.....	149
4.7.23	EQ Preset ON/OFF Setting Acquisition.....	149
4.7.24	EQ Preset ON/OFF Setting .....	150
4.7.25	EQ Preset ON/OFF Setting Change Notification .....	151
4.7.26	EQ Preset Band ON/OFF Setting Acquisition .....	151
4.7.27	EQ Preset Band ON/OFF Setting .....	152
4.7.28	EQ Preset Band ON/OFF Setting Change Notification .....	153

4.7.29	EQ Preset Gain Setting Acquisition for Each Band.....	153
4.7.30	EQ Preset Gain Setting for Each Band .....	154
4.7.31	EQ Preset Gain Setting Change Notification for Each Band .....	155
4.7.32	EQ Preset Frequency Setting Acquisition for Each Band .....	156
4.7.33	EQ Preset Frequency Setting for Each Band.....	157
4.7.34	EQ Preset Frequency Setting Change Notification for Each Band .....	157
4.7.35	EQ Preset Q Setting Acquisition for Each Band.....	158
4.7.36	EQ Preset Q Setting for Each Band .....	159
4.7.37	EQ Preset Q Setting Change Notification for Each Band .....	160
4.7.38	EQ Preset Filter Type Setting Acquisition for Each Band .....	160
4.7.39	EQ Preset Filter Type Setting for Each Band .....	161
4.7.40	EQ Preset Name Acquisition .....	162
4.7.41	EQ Preset Name Setting .....	163
4.7.42	EQ Preset Name Change Notification.....	164
4.7.43	EQ Preset Type (FactoryPreset/UserPreset) Acquisition.....	164
4.8	COMP.....	165
4.8.1	COMP ON/OFF Setting Acquisition.....	165
4.8.2	COMP ON/OFF Setting .....	166
4.8.3	COMP ON/OFF Setting Change Notification .....	167
4.8.4	COMP Ratio Setting Acquisition .....	167
4.8.5	COMP Ratio Setting .....	168
4.8.6	COMP Ratio Setting Change Notification.....	169
4.8.7	COMP Threshold Setting Acquisition .....	169
4.8.8	COMP Threshold Setting.....	170
4.8.9	COMP Threshold Setting Change Notification .....	171
4.8.10	COMP Attack Setting Acquisition.....	171
4.8.11	COMP Attack Setting .....	172
4.8.12	COMP Attack Setting Change Notification .....	173
4.8.13	COMP Release Setting Acquisition .....	174
4.8.14	COMP Release Setting.....	175
4.8.15	COMP Release Setting Change Notification .....	175
4.8.16	COMP Gain Setting Acquisition .....	176
4.8.17	COMP Gain Setting .....	177
4.8.18	COMP Gain Setting Change Notification .....	177
4.8.19	Last Recalled COMP Preset Acquisition for Each Ch.....	178
4.8.20	Last Recalled COMP Preset Setting for Each Ch .....	179
4.8.21	Last Recalled COMP Preset Change Notification for Each Ch.....	179
4.8.22	COMP Preset Recall Request.....	180
4.8.23	COMP Preset ON/OFF Setting Acquisition .....	180
4.8.24	COMP Preset ON/OFF Setting.....	181

4.8.25	COMP Preset ON/OFF Setting Change Notification .....	182
4.8.26	COMP Preset Ratio Setting Acquisition .....	182
4.8.27	COMP Preset Ratio Setting .....	183
4.8.28	COMP Preset Ratio Setting Change Notification .....	184
4.8.29	COMP Preset Threshold Setting Acquisition .....	185
4.8.30	COMP Preset Threshold Setting .....	186
4.8.31	COMP Preset Threshold Setting Change Notification .....	186
4.8.32	COMP Preset Attack Setting Acquisition .....	187
4.8.33	COMP Preset Attack Setting .....	188
4.8.34	COMP Preset Attack Setting Change Notification .....	188
4.8.35	COMP Preset Release Setting Acquisition .....	189
4.8.36	COMP Preset Release Setting .....	190
4.8.37	COMP Preset Release Setting Change Notification .....	191
4.8.38	COMP Preset Gain Setting Acquisition .....	191
4.8.39	COMP Preset Gain Setting .....	192
4.8.40	COMP Preset Gain Setting Change Notification .....	193
4.8.41	COMP Preset Name Setting Acquisition .....	193
4.8.42	COMP Preset Name Setting .....	194
4.8.43	COMP Preset Name Setting Change Notification .....	195
4.8.44	COMP Preset Type (FactoryPreset/UserPreset) Acquisition .....	196
4.9	Status .....	197
4.9.1	RxLink Information Acquisition .....	197
4.9.2	RxLink Status Change Notification .....	198
4.9.3	RU Connection Status Acquisition .....	199
4.9.4	RU Connection Status Change Notification .....	200
4.9.5	Lock Status Acquisition .....	200
4.9.6	Lock Status Change Notification .....	201
4.9.7	Busy Status Acquisition .....	202
4.9.8	Busy Status Change Notification .....	203
4.9.9	Level Notification .....	203
4.9.10	Applog Notification .....	204
4.9.11	RSSI and Battery Applog Parameter Acquisition .....	205
4.9.12	RSSI and Battery Applog Parameter Setting .....	206
4.9.13	RSSI and Battery Applog Parameter Change Notification .....	207
4.10	Other Functions .....	207
4.10.1	2.4 GHz Band RF Scan Start/End .....	207
4.10.2	2.4 GHz Band RF Scan Result Notification .....	208
4.10.3	RX Identify Request .....	209
4.10.4	Preset Recall Request .....	209
4.10.5	Factory Reset Request .....	210

4.10.6	Reboot Request.....	210
4.10.7	Reboot Completion Notification .....	211
5	Appendix.....	212

# 1 Preface

## 1.1 Purpose of This Document

This document describes the command specifications to control the Engineered Sound Wireless System (hereinafter referred to as the Device) developed in Audio-Technica.

### 1.1.1 Definitions of Terms and Numeric Representation

Term	Description
The Device	Generic name of the model
External device	Devices other than System20 Digital Wireless connected to the Device
Current	Means the active operating condition. Example: Current setting = Active setting
Resume	To store some or all of the current settings inside the unit.
TBD	To be defined.
Tentative	Means provisional description.
RX	Refers to the receiver ATW-R1440.
RU	Refers to the receiver unit ATW-RU14.
RC	Refers to the receiver chassis ATW-RC14.
TX	Refers to all transmitter models.
BP	Refers to the body pack transmitter ATW-T1401.
HH	Refers to the handheld microphone transmitter ATW-T1402.
BD	Refers to the boundary microphone transmitter ATW-T1406.
DS	Refers to the desk stand transmitter ATW-T1407.
CHG	Refers to the charger ATW-CHG3.
WLM	Refers to the wireless app WL Manager.
PC	Refers to both Windows PC and Mac.
LINK	A state in which TX and RX are communicating. A state in which both audio transmission/reception and data communication are established.
Register	An action of recording devices linked by TX and RX, respectively.
Pairing	A state in which TX and RU are looking for LINK destinations.
Searching	A state in which a device with a stored ID is searched.
Ch	Channel
RX LINK	A state in which multiple RXs are daisy-chained with LINK cables and synchronized.

The numeric representation is defined as follows:

Binary number: A value followed by b      Example: 1010 0110b

Hexadecimal number: A value preceded by 0x   Example: 0xA6

For the notation of FW versions, leading zeros are omitted in this manual as follows.

Zeros are not omitted in the parameters of the command.

00X.00Y.00Z -> X.Y.Z

Example: 001.001.000 -> 1.1.0

Example: 001.001.010 -> 1.1.10

## 2 Basic Specifications

The IP control function uses TCP or UDP protocol to control the Device.

### 2.1 Communication Interfaces

#### 2.1.1 RX Communication Interface

**Table 2-1-1 System20 RX Communication Interface**

No	Item	Content	Remarks
1.	Communication system	Full duplex	
2.	Transmission speed	10Mbps / 100Mbps	
3.	Port number	TCP (control): 17200	Cannot be changed. (Fixed value)
		UDP (notification): 17000	Can be changed. (17000 at factory shipment)
4.	Maximum data length	287 bytes (including line feed codes)	32 bytes for Ethernet communication header, 255 bytes for control command
5.	Compatible connector	Device: RJ45 connector (compatible with 10/100 Mbps) Cable: CAT5e or higher	

### 2.2 Command Formats

Transmitted commands are categorized as follows:

**Table 2-2 Command Formats**

No	Command	Content	Remarks
1.	Set Command	Action command	Change the settings. Use TCP communication.
2.	Get Command	Action command	Obtain the settings and status of the Device. Use TCP communication.
3.	ACK	Acknowledge	Positive response to a Set Command. Use TCP communication.
4.	NAK	Negative acknowledge	Response to a Command. Use TCP communication.
5.	Answer	Setting status notification	Response to a Get Command. Use TCP communication.
6.	Information	Status change notification	Notify the settings and status change of the Device. Use UDP communication.
7.	Request Command	Action command	Requests an action to the host. Use TCP communication.

#### 2.2.1 Command Common Rules

It is case sensitive.

Use a single-byte space ( \_ : 0x20) as a delimiter.

Use a comma (,: 0x2C) as a delimiter in the parameter.

In general, use ASCII codes for commands and UTF-8 for the parameters of specific commands  
(Example: Naming a device, etc.).

Add CR (0x0d) to the end of each command.

Example:

```
smyname_S_0000_00_NC_1,"SYSTEM20"\nsmyname _0000_00_NC_ACK_\nsmyname _0000_00_NC_NAK_01_\nMD_smmyname _0000_00_NC_1,"SYSTEM20"\n
```

- \_: Indicates a space.
- \n: Indicates CR (0x0d).
- **[ ]**: Indicates a command parameter.

### 2.2.2 Get Command / Set Command / Request Command

Format of each command is shown below.

**Table 2-2-2 Action Command Format**

No	Item	Content	Size	Remarks
1	Command	Command	Variable length	Varies according to the command.
2	Handshake Select	Sequence execution system	1byte	H: Handshake method (Unused) O: One-Way method S: ACK/NAK method
3	RxLink ID	RxLink ID	4byte	ID when RxLink is established Primary:0001 Extension: 0002 to 0005 (Supported command only)
4	Unit ID	Unit ID	2byte	00 (fixed)
5	Continue Select	Divided message system	2byte	NC: No divided message CS: Head of divided message CM: Divided message CE: End of divided message
6	Parameter	Command parameter	0 bytes or larger; Variable length	Varies according to the command.
7	End Character	Message end character	1byte	CR (0xD)

### 2.2.3 ACK

The ACK command format is shown below. Use TCP communication.

**Table 2-2-3 ACK Format**

No	Item	Content	Size	Remarks
1	Command	Command	Variable length	Varies according to the command.
2	RxLink ID	RxLink ID	4byte	ID when RxLink is established Primary:0001 Extension: 0002 to 0005 (Supported command only)
3	Unit ID	Unit ID	2byte	00 (fixed)
4	Continue Select	Divided message system	2byte	NC: No divided message (fixed)
5	ACK	ACK	3byte	ACK (fixed)
6	End Character	Message end character	1byte	CR (0x0D)

#### 2.2.4 NAK

The negative acknowledge (NAK) command format is shown below. Use TCP communication.

**Table 2-2-4 NAK Format**

No	Item	Content	Size	Remarks
1	Command	Command	Variable length	Varies according to the command.
2	RxLink ID	RxLink ID	4byte	ID when RxLink is established Primary:0001 Extension: 0002 to 0005 (Supported command only)
3	Unit ID	Unit ID	2byte	00 (fixed)
4	Continue Select	Divided message system	2byte	NC: No divided message (fixed)
5	NAK	NAK	3byte	NAK (fixed)
6	Error Code	Error code	2byte	
7	End Character	Message end character	1byte	CR (0x0D)

##### 2.2.4.1 Error Codes List

**Table 2-2-4-1 Error Codes List**

Error code	Error description	Remarks
01	Syntax error	<ul style="list-style-type: none"> <li>• A required element is not found.</li> <li>• The character string of a required element is incorrect.</li> <li>• The character string length for each element is outside the specified range.</li> <li>• The message string length including line feed codes is greater than the upper limit.</li> </ul>
02	Invalid command	(A non-existing command was specified. A command that cannot be used for the device was specified.)

04	Parameter error	<ul style="list-style-type: none"><li>• The parameter is outside the specified range.</li><li>• Changing a parameter that cannot be changed was attempted.</li></ul>
90	Busy	<ul style="list-style-type: none"><li>• Unable to process due to a busy state</li></ul>
99	Other errors	<ul style="list-style-type: none"><li>• Errors other than the above</li></ul>

### 2.2.5 Answer

The command format of the setting status response is shown below. Use TCP communication.

**Table 2-2-5 Setting Status Response Format**

No	Item	Content	Size	Remarks
1	Command	Command	Variable length	Varies according to the command.
2	RxLink ID	RxLinkID	4byte	ID when RxLink is established Primary:0001 Extension: 0002 to 0005 (Supported command only)
3	Unit ID	Unit ID	2byte	00 (fixed)
4	Continue Select	Divided message system	2byte	NC: No divided message CS: Head of divided message CM: Divided message CE: End of divided message
5	Parameter	Command parameter	0 bytes or larger; Variable length	Varies according to the command.
6	End Character	Message end character	1byte	CR (0x0D)

### 2.2.6 Information

The command format of the status change notification command is shown below. Use UDP communication.

**Table 2-2-6 Notification Command Format**

No	Item	Content	Size	Remarks
1	Modify	MD	2byte	MD (fixed)
2	Command	Command string	5byte	See 3. Command List.
3	RxLinkID	RxLinkID	4byte	ID when RxLink is established Primary:0001 Extension: 0002 to 0005 (Supported command only)
4	Unit ID	Unit ID	2byte	00 (fixed)
5	Continue Select	Divided message system	2byte	NC: No divided message CS: Head of divided message CM: Divided message CE: End of divided message
6	Parameter	Command parameter	0 bytes or larger; Variable length	Varies according to the command.
7	End Character	Message end character	1byte	CR (0x0D)

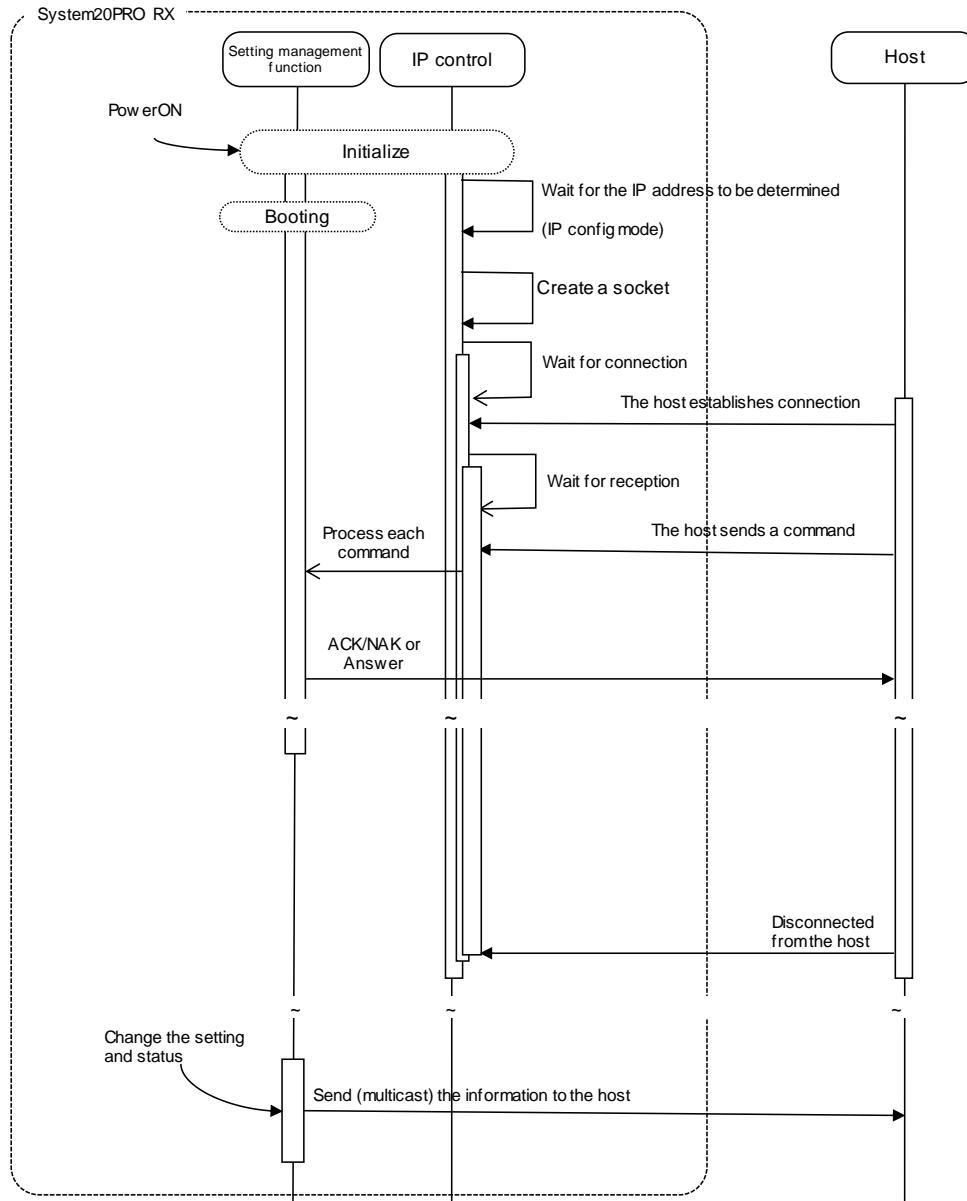

## 2.3 TCP Communications

To control the Device from the host, TCP protocol is used for communications.

### 2.3.1 Communication Control

The following figure shows the communication control flow of IP control.

**Table 2-3-1 TCP Communication Control Flow**

- After the system is booted, the status changes from initializing to connection waiting.
- When the host establishes connection with the system, the status changes from connection waiting to reception waiting.
- Received commands are processed by internal processing tasks, and the results (ACK/NAK) are sent.

Since commands are asynchronously processed, reception is possible even during processing (The next command can be sent without waiting for ACK/NAK or Answer). However, some commands

return NAK (90: BUSY).

- When the system is disconnected from the host, the status changes from reception waiting to connection waiting.

### 2.3.2 Communication Start

The host establishes connections with the Device.

Number of connections is limited to one. Concurrent connections are not allowed.

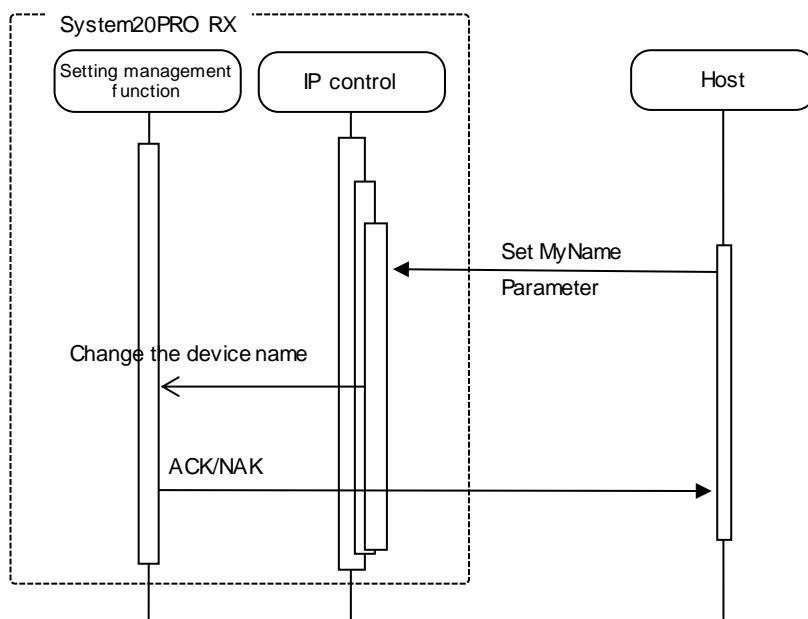

If the number of connections exceeds the upper limit, the connection fails.

### 2.3.3 Control Sequence

#### 2.3.3.1 Set Command

Responding to a Set Command, the Device sends ACK/NAK to the sender.

<Example> The sequence of Device Name Setting of the device is shown below.

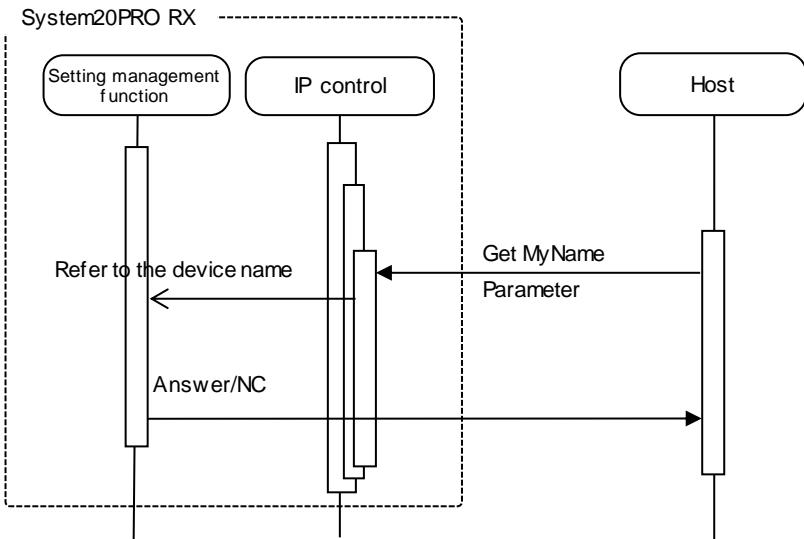

If an error occurs in a Set Command, such as a syntax error and incorrect parameter, an NAK command is sent to the sender.

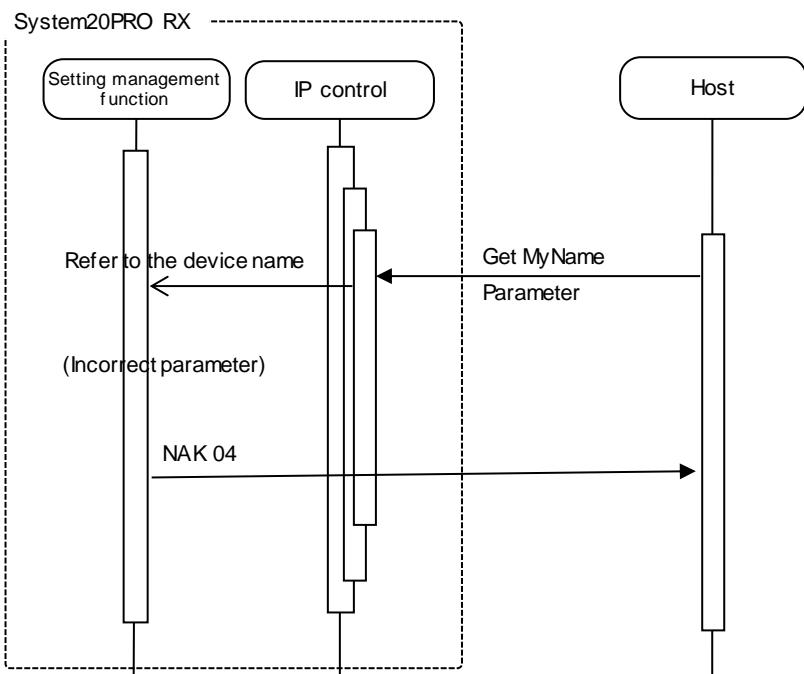

### 2.3.3.2 Get Command

Responding to a Get Command, the Device sends Answer to the sender.

<Example> The sequence of Device Name Acquisition of the device is shown below.

If an error occurs in a Get Command, such as a syntax error or incorrect parameter, an NAK command is sent to the sender.

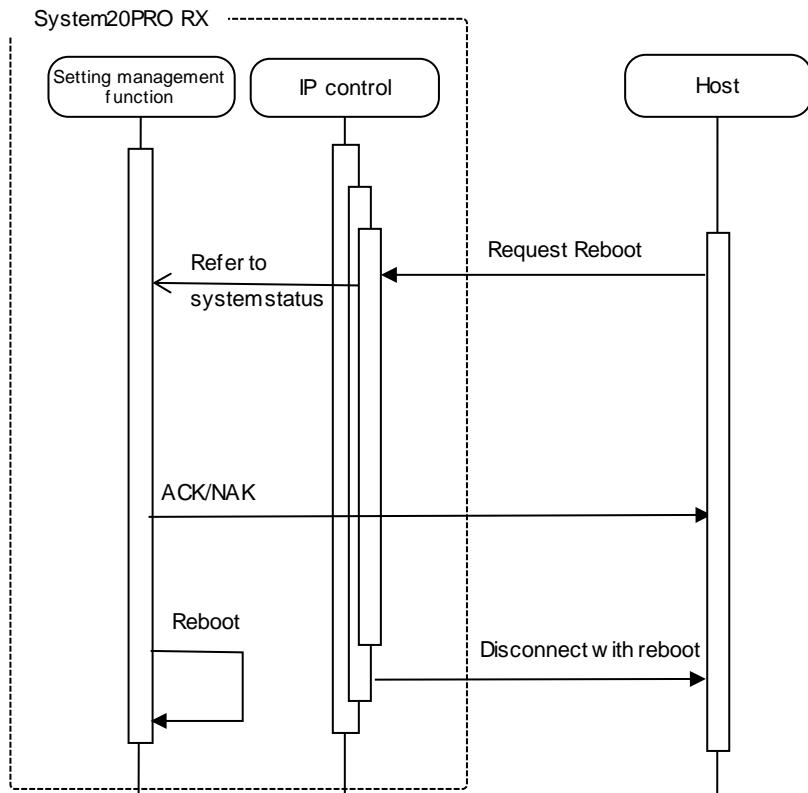

### 2.3.3.3 Request Command

The request command sends whether the command was accepted or not to the sender via ACK/NAK and then performs the requested process if it was accepted (ACK response).

There is a subsequent command available to send the measurement result to the sender.

#### (1) Reboot command

<Example> The sequence of the Reboot request is shown below.

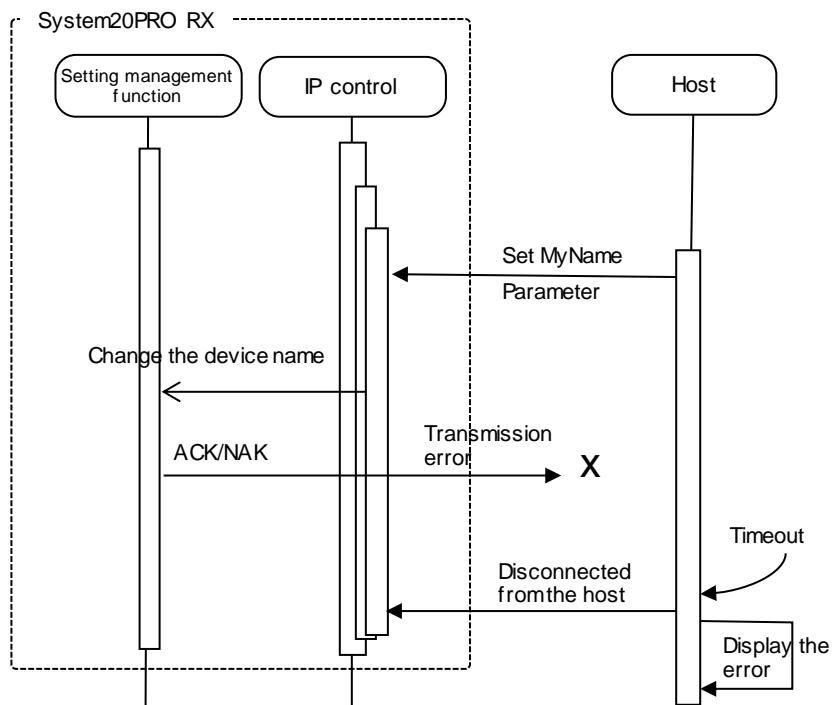

\*For NAK responses (telegraphic error, etc.), the system is not reset.

## 2.3.4 Communication Errors

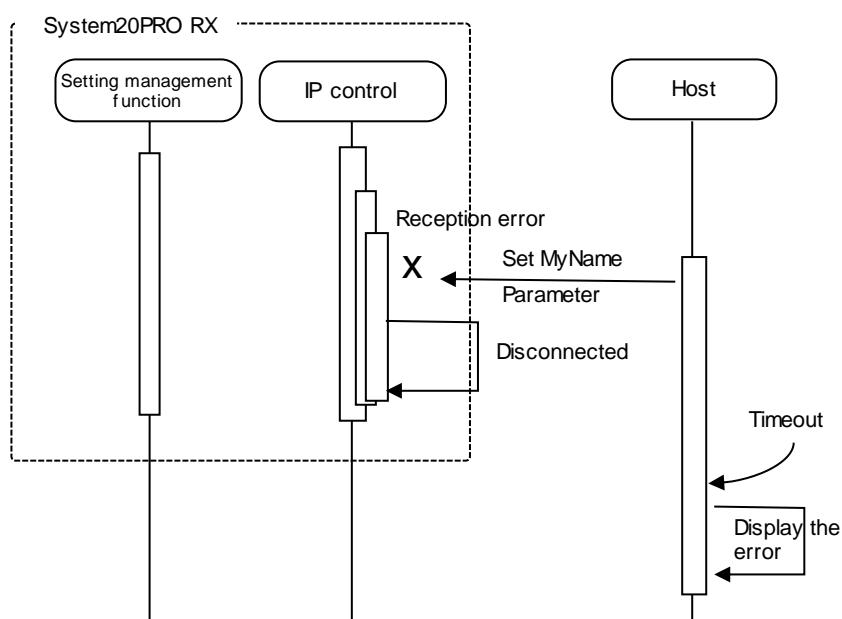

### 2.3.4.1 Transmission Errors

The following figure shows the sequence when an ACK/NAK transmission error occurs.

## Reception Errors

The following figure shows the sequence when a command receive error occurs.

### 2.3.5 End of Communication

The host can be disconnected at any timing when communications end.

When it is disconnected, the Device clears the corresponding connection state (Example: File transferring) and enters the connection wait state again. This occurs even if a cable is disconnected.  
To communicate again, the host needs to establish connection.

## 2.4 UDP Communications

The information (status change notification) from the Device is sent via UDP protocol.

### 2.4.1 Communication Control

Refer to Chapter 2.3.1 for the communication control flow.

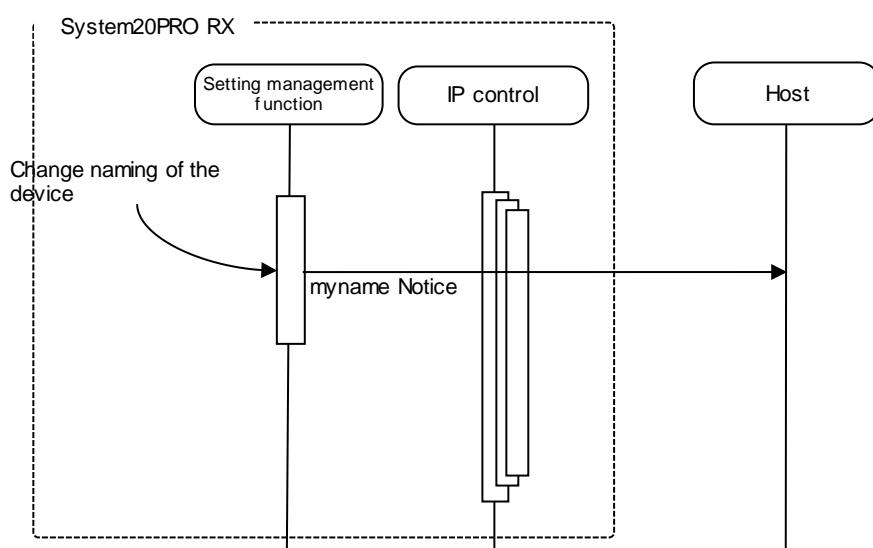

### 2.4.2 Communication Start

The host registers groups to the multicast address.

### 2.4.3 Control Sequence

If the Device status changes, a status change notification is sent.

<Example> The sequence of naming change notification is shown below.

### 2.4.4 Communication Errors

For details on the sequence for transmission errors, see Chapter 2.3.4.

### 2.4.5 End of Communication

The host can unregister groups at any timing.

### 3 Command Overview

#### 3.1 Command List

No	Category	Command	Command Name	Remarks	Type				Target	
					Set	Get	Req	Info	RX	TX
1	Device Setting	gmymodel	Model Name Acquisition			○			○	
2		gsys20version	Version Information Acquisition			○			○	
3		gmyname	Device Name Acquisition			○			○	
4		smyname	Device Name Setting		○				○	
5		nmyname	Device Name Change Notification		○				○	
6		gmydeviceid	Device ID Acquisition			○			○	
7		smydeviceid	Device ID Setting		○				○	
8		nmydeviceid	Device ID Change Notification					○	○	
9		gmyid	System20 ID Acquisition			○			○	
10		gautolock	Auto Lock ON/OFF Setting Acquisition			○			○	
11		sautolock	Auto Lock ON/OFF Setting		○				○	
12		nautolock	Auto Lock ON/OFF Setting Change Notification					○	○	
13		gafmeter	AF Meter Setting Acquisition			○			○	
14		safmeter	AF Meter Setting		○				○	
15		nafmeter	AF Meter Setting Change Notification					○	○	
16		gdial	Jog Dial Direction Setting Acquisition			○			○	
17		sdial	Jog Dial Direction Setting		○				○	
18		ndial	Jog Dial Direction Setting Change Notification					○	○	
19	Network	gipnet	Network Information Acquisition			○			OP	
20		sipnet	Network Information Setting		○				OP	

No	Category	Command	Command Name	Remarks	Type				Target	
					Set	Get	Req	Info	RX	TX
21		nipnet	Network Information Setting Change Notification					<input type="radio"/>	OP	
22		gnoticemode	Notification Mode Acquisition			<input type="radio"/>			OP	
23		snoticemode	Notification Mode Setting		<input type="radio"/>				OP

44	Communication	sntpserveraddress	NTP Server Address Setting		○				○P	
45		nntpserveraddress	NTP Server Address Change Notification					○	○P	
46		gnntpserverportno	NTP Server Port Acquisition			○			○P	
47		sntpserverportno	NTP Server Port Setting						○P	
48		nntpserverportno	NTP Server Port Change Notification					○	○P	
49		gnptimezone	NTP Time Zone Setting Acquisition			○			○P	
50		sntptimezone	NTP Time Zone Setting		○				○P	
51		nntptimezone	NTP Time Zone Setting Change Notification					○	○P	
52		gdstmode	DST ON/OFF Setting Acquisition			○			○P	
53		sdstmode	DST ON/OFF Setting		○				○P	
54		nddstmode	DST ON/OFF Setting Change Notification					○	○P	
55		gdstdatetime	DST Date and Time Setting Acquisition			○			○P	
56		sdstdatetime	DST Date and Time Setting		○				○P	
57		ndstdatetime	DST Date and Time Setting Change Notification					○	○P	
58	Communication	ghdmode	RF Mode Acquisition			○			○P	
59		shdmode	RF Mode Setting		○				○P	
60		nhdmode	RF Mode Change Notification					○	○P	
61		gmultitx	MultiTx ON/OFF Setting Acquisition			○			○	
62		smultitx	MultiTx ON/OFF Setting		○				○	
63		nmultitx	MultiTx ON/OFF Setting Change Notification					○	○	
64		npairing	Pairing Status Change Notification					○	○	
65		rpairing	Pairing Request				○		○	

No	Category	Command	Command Name	Remarks	Type				Target	
					Set	Get	Req	Info	RX	TX
66		rclpairing	Pairing Cancel Request				○		○	
67		gmultipairid	Multipairing ID Acquisition			○			○	
68		nmultipairid	Multipairing ID Change Notification					○	○	
69		rdelmultipairid	Multipairing ID Deletion Request				○		○	
70	Audio	gmixout	Mixout ON/OFF Setting Acquisition			○			○	
71		smixout	Mixout ON/OFF Setting		○				○	
72		nmixout	Mixout ON/OFF Setting Change Notification					○	○	
73		gchoutputtype	OutputType Acquisition for Each Ch			○			○	
74		schoutputtype	OutputType Setting for Each Ch		○				○	
75		nchoutputtype	OutputType Change Notification for Each Ch					○	○	
76		gchvolume	Volume Acquisition for Each Ch			○			○	
77		schvolume	Volume Setting for Each Ch		○				○	
78		nchvolume	Volume Change Notification for Each Ch					○	○	
79		gchhpf	HPF Setting Acquisition for Each Ch			○			○	
80		schhpf	HPF Setting for Each Ch		○				○	
81		nchhpf	HPF Setting Change Notification for Each Ch					○	○	
82		gchmixout	Mixout ON/OFF Setting Acquisition for Each Ch			○			○	
83		schmixout	Mixout ON/OFF Setting for Each Ch		○				○	
84		nchmixout	Mixout ON/OFF Setting Change Notification for Each Ch					○	○	
85		gmixoutvolume	Mixout Volume Setting Acquisition for Each Ch			○			○	
86		smixoutvolume	Mixout Volume Setting for Each Ch		○				○	
87		nmixoutvolume	Mixout Volume Setting Notification for Each Ch					○	○	

No	Category	Command	Command Name	Remarks	Type				Target	
					Set	Get	Req	Info	RX	TX
88		gmixoutputtype	Mixout OutputType Setting Acquisition			○			○	
89		smixoutputtype	Mixout OutputType Setting		○				○	
90		nmixoutputtype	Mixout OutputType Setting Change Notification					○	○	
91		glimiter	Limiter Setting Acquisition			○			○	
92		slimiter	Limiter Setting		○				○	
93		nlimiter	Limiter Setting Change Notification					○	○	
94		gstsmute	Mute Setting Acquisition for Each Ch			○			○	
95		schmute	Mute Setting for Each Ch		○				○	
96		nchmute	Mute Setting Change Notification for Each Ch					○	○	
97	TX	gststx	TX Connection Status Acquisition			○				○
98		nststx	TX Connection Status Notification					○		○
99		gtxmodel	TX Model Name Acquisition			○				○
100		rtxledflash	TX Identify Request				○			○
101		gtxdeviceid	TxID Acquisition			○				○
102		stxdeviceid	TxID Setting		○					○
103		ntxdeviceid	TxID Change Notification					○		○
104		gtxmicgain	TX Gain Setting Acquisition			○				○
105		stxmicgain	TX Gain Setting		○					○
106		ntxmicgain	TX Gain Setting Change Notification					○		○
107		gtxinput	TX MIC/INST Setting Acquisition	BP only		○○				○BP
108		stxinput	TX MIC/INST Setting	BP only	○					○BP
109		ntxinput	TX MIC/INST Setting Change Notification	BP only				○		○BP

No	Category	Command	Command Name	Remarks	Type				Target	
					Set	Get	Req	Info	RX	TX
110		gtxmutemode	TX MuteMode Setting Acquisition			○				○
111		stxmutemode	TX MuteMode Setting		○					○
112		ntxmutemode	TX MuteMode Setting Change Notification					○		○
113		gtxled	TX LED Mode Acquisition			○				○
114		stxled	TX LED Mode Setting		○					○
115		ntxled	TX LED Mode Change Notification					○		○
116		gtxbattery	TX Battery Type Acquisition	HH and BP only		○				○HP
117		stxbattery	TX Battery Type Setting	HH and BP only	○					○HP
118		ntxbattery	TX Battery Type Change Notification	HH and BP only				○		○HP
119		gtxtimeout	TX Pairing Timeout Time Acquisition			○				○
120		stxtimeout	TX Pairing Timeout Time Setting		○					○
121		ntxtimeout	TX Pairing Timeout Time Change Notification					○		○
122		gtcid	TX System20 ID Acquisition			○				○
123		gtxsys20version	TX Version Acquisition			○				○
124		rtxfactoryreset	TX Factory Reset Request				○			○
125		rtxreboot	TX Reboot Request				○			○
126		gtxforcedmute	TX External Mute Acquisition			○				○
127		stxforcedmute	TX External Mute Setting		○					○
128		ntxforcedmute	TX External Mute Change Notification					○		○
129		gtxforcedmutedled	TX External Mute LED Display Setting Acquisition			○				○
130		stxforcedmutedled	TX External Mute LED Display Setting		○					○
131		Ntxforcedmutedled	TX External Mute LED Display Setting Change Notification					○		○

No	Category	Command	Command Name	Remarks	Type				Target	
					Set	Get	Req	Info	RX	TX
132		gtxmute	TX Mute Status Acquisition			○				○
133		ntxmute	TX Mute Status Change Notification					○		○
134		glevelbattx	TX Battery Level Acquisition			○				○
135		nlevelbattx	TX Battery Level Change Notification					○		○
136	EQ	geqenable	EQ ON/OFF Setting Acquisition			○				○
137		seqenable	EQ ON/OFF Setting		○					○
138		neqenable	EQ ON/OFF Setting Change Notification					○		○
139		geqband	EQ ON/OFF Setting Acquisition for Each Band			○				○

## 4 Command Details

Details about all commands are described below.

### 4.1 Management

#### 4.1.1 Model Name Acquisition

##### (1) Get Command

gmymodel\_O\_0001\_00\_NC\_↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	gmymodel		
2	Handshake Select	Sequence execution system	string	O		
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
4	Unit ID	Unit ID	string	00	See 2.2.2.	
5	Continue Select	Divided message system	string	NC	No divided message	
6	Parameter	Parameter			No parameter	
7	End Character	Message end character	binary	0x0d	CR	

##### (2) Answer

gmymodel\_0001\_00\_NC\_"ATW-R1440 ",↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	gmymodel		
2	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
3	Unit ID	Unit ID	string	00	See 2.2.2.	
4	Continue Select	Divided message system	string	NC	No divided message	

No	item	Description	type	value	value description	remarks
5	Parameter	Model name	string	ASCII code	Name	Enclose the 16 characters in quotation marks (").
		DECT mode	string	Blank	DECT mode	Blank for System20 as it is unused
6	End Character	Message end character	binary	0x0d	CR	

#### 4.1.2 Version Information Acquisition

##### (1) Get Command

gsys20version\_O\_0001\_00\_NC\_↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	gsys20version		
2	Handshake Select	Sequence execution system	string	O		
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
4	Unit ID	Unit ID	string	00	See 2.2.2.	
5	Continue Select	Divided message system	string	NC	No divided message	
6	Parameter	Parameter			No parameter	
7	End Character	Message end character	binary	0x0d	CR	

##### (2) Answer

gsys20version\_0001\_00\_NC\_"001.000.000 ","001.000.000 ","001.001.000 ,  
"001.000.000 ","001.000.000 "↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	gsys20version		

No	item	Description	type	value	value description	remarks
2	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
3	Unit ID	Unit ID	string	00	See 2.2.2.	
4	Continue Select	Divided message system	string	NC	No divided message	
5	Parameter	Integrated file version	string	ASCII code	Version	Enclose the 12 characters in quotation marks (").
		MCU F/W version	string	ASCII code	Version	Enclose the 12 characters in quotation marks (").
		RC FPGA version	string	ASCII code	Version	Enclose the 12 characters in quotation marks (").
		RU FPGA version	string	ASCII code	Version	Enclose the 12 characters in quotation marks (").
		RU MOD version	string	ASCII code	Version	Enclose the 12 characters in quotation marks (").
6	End Character	Message end character	binary	0x0d	CR	

#### 4.1.3 Device Name Acquisition

After receiving the Device Name Acquisition, RX sends the device name to the host via Answer.

##### (1) Get Command

gmyname\_O\_0001\_00\_NC\_↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	gmyname		
2	Handshake Select	Sequence execution system	string	O		
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
4	Unit ID	Unit ID	string	00	See 2.2.2.	
5	Continue Select	Divided message system	string	NC	No divided message	
6	Parameter	Parameter			No parameter	
7	End Character	Message end character	binary	0x0d	CR	

##### (2) Answer

gmyname\_0001\_00\_NC\_"SYSTEM20"↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	gmyname		
2	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
3	Unit ID	Unit ID	string	00	See 2.2.2.	
4	Continue Select	Divided message system	string	NC	No divided message	
5	Parameter	Device name	string	ASCII code	Name	Enclose the eight characters in quotation marks (").
6	End Character	Message end character	binary	0x0d	CR	

#### 4.1.4 Device Name Setting

##### (1) Set Command

The available ASCII characters in setting are "A to Z," "+-.#&," "0 to 9," and "space."

smynname\_S\_0001\_00\_NC\_"SYSTEM20"↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	smynname		
2	Handshake Select	Sequence execution system	string	S

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	gmydeviceid		
2	Handshake Select	Sequence execution system	string	O		
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
4	Unit ID	Unit ID	string	00	See 2.2.2.	
5	Continue Select	Divided message system	string	NC	No divided message	
6	Parameter	Parameter			No parameter	
7	End Character	Message end character	binary	0x0d	CR	

##### (2) Answer

gmydeviceid\_0001\_00\_NC\_0↙

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	gmydeviceid		
2	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
3	Unit ID	Unit ID	string	00	See 2.2.2.	
4	Continue Select	Divided message system	string	NC	No divided message	
5	Parameter	Device ID	string	0~999		
6	End Character	Message end character	binary	0x0d	CR	

#### 4.1.7 Device ID Setting

##### (1) Set Command

The command format for Device Name Setting from the host is shown below.

smydeviceid\_S\_0001\_00\_NC\_1↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	smydeviceid		
2	Handshake Select	Sequence execution system	string	S		
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
4	Unit ID	Unit ID	string	00	See 2.2.2.	
5	Continue Select	Divided message system	string	NC	No divided message	
6	Parameter	Device ID	string	0~999		
7	End Character	Message end character	binary	0x0d	CR	

#### 4.1.8 Device ID Change Notification

##### (1) Information

MD\_nmydeviceid\_0001\_00\_NC\_1↓

No	item	Description	type	value	value description	remarks
1	Modify	MD	string	MD		
2	Command	Command string	string	nmydeviceid		
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
4	Unit ID	Unit ID	string	00	See 2.2.2.	
5	Continue Select	Divided message system	string	NC	No divided message	
6	Parameter	Device ID	string	0~999		
7	End Character	Message end character	binary	0x0d	CR	

#### 4.1.9 System20 ID Acquisition

(1) Get Command

gmyid\_O\_0001\_00\_NC\_↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	gmyid		
2	Handshake Select	Sequence execution system	string	O		
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
4	Unit ID	Unit ID	string	00	See 2.2.2.	
5	Continue Select	Divided message system	string	NC	No divided message	
6	Parameter	Parameter			No parameter	
7	End Character	Message end character	binary	0x0d	CR	

(2) Answer

gmyid\_0001\_00\_NC\_ "45012343"↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	gmyid		
2	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
3	Unit ID	Unit ID	string	00	See 2.2.2.	
4	Continue Select	Divided message system	string	NC	No divided message	
5	Parameter	System20ID	string	ASCII character	Enclose the eight characters of hexadecimal number in quotation marks (").	
6	End Character	Message end character	binary	0x0d	CR	

## 4.2 Control Setting

### 4.2.1 Auto Lock ON/OFF Setting Acquisition

#### (1) Get Command

gautolock\_O\_0001\_00\_NC\_↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	gautolock		
2	Handshake Select	Sequence execution system	string	O		
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
4	Unit ID	Unit ID	string	00	See 2.2.2.	
5	Continue Select	Divided message system	string	NC	No divided message	
6	Parameter	Parameter			No parameter	
7	End Character	Message end character	binary	0x0d	CR	

#### (2) Answer

gautolock\_0001\_00\_NC\_0↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	gautolock		
2	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
3	Unit ID	Unit ID	string	00	See 2.2.2.	
4	Continue Select	Divided message system	string	NC	No divided message	
5	Parameter	Auto lock setting	string	0~1	0:OFF / 1:ON	
6	End Character	Message end character	binary	0x0d	CR	

#### 4.2.2 Auto Lock ON/OFF Setting

##### (1) Set Command

sautolock\_S\_0001\_00\_NC\_1↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	sautolock		
2	Handshake Select	Sequence execution system	string	S		
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
4	Unit ID	Unit ID	string	00	See 2.2.2.	
5	Continue Select	Divided message system	string	NC	No divided message	
6	Parameter	Auto lock setting	string	0~1	0:OFF / 1:ON	
7	End Character	Message end character	binary	0x0d	CR	

#### 4.2.3 Auto Lock ON/OFF Setting Change Notification

##### (1) Information

MD\_nautolock\_0001\_00\_NC\_1↓

No	item	Description	type	value	value description	remarks
1	Modify	MD	string	MD		

No	item	Description	type	value	value description	remarks
2	Command	Command string	string	nautolock		
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
4	Unit ID	Unit ID	string	00	See 2.2.2.	
5	Continue Select	Divided message system	string	NC	No divided message	
6	Parameter	Auto lock setting	string	0~1	0:OFF / 1:ON	
7	End Character	Message end character	binary	0x0d	CR	

#### 4.2.4 AF Meter Setting Acquisition

##### (1) Get Command

gafmeter\_O\_0001\_00\_NC\_↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	gafmeter		
2	Handshake Select	Sequence execution system	string	O		
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
4	Unit ID	Unit ID	string	00	See 2.2.2.	
5	Continue Select	Divided message system	string	NC	No divided message	
6	Parameter	Parameter			No parameter	
7	End Character	Message end character	binary	0x0d	CR	

##### (2) Answer

gafmeter\_0001\_00\_NC\_0↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	gafmeter		
2	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	

No	item	Description	type	value	value description	remarks
3	Unit ID	Unit ID	string	00	See 2.2.2.	
4	Continue Select	Divided message system	string	NC	No divided message	
5	Parameter	AF Meter Setting	string	0~1	0:Pre / 1:Post	
6	End Character	Message end character	binary	0x0d	CR	

#### 4.2.5 AF Meter Setting

##### (1) Set Command

safmeter\_S\_0001\_00\_NC\_0↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	safmeter		
2	Handshake Select	Sequence execution system	string	S		
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
4	Unit ID	Unit ID	string	00	See 2.2.2.	
5	Continue Select	Divided message system	string	NC	No divided message	
6	Parameter	AF Meter Setting	string	0~1	0:Pre / 1:Post	
7	End Character	Message end character	binary	0x0d	CR	

#### 4.2.6 AF Meter Setting Change Notification

##### (1) Information

MD\_nafmeter\_0001\_00\_NC\_1↓

No	item	Description	type	value	value description	remarks
1	Modify	MD	string	MD		
2	Command	Command string	string	nafmeter		
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	

No	item	Description	type	value	value description	remarks
4	Unit ID	Unit ID	string	00	See 2.2.2.	
5	Continue Select	Divided message system	string	NC	No divided message	
6	Parameter	AF Meter Setting	string	0~1	0:Pre / 1:Post	
7	End Character	Message end character	binary	0x0d	CR	

#### 4.2.7 Jog Dial Direction Setting Acquisition

(1) Get Command

gdial\_O\_0001\_00\_NC\_↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	gdial		
2	Handshake Select	Sequence execution system	string	O		
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
4	Unit ID	Unit ID	string	00	See 2.2.2.	
5	Continue Select	Divided message system	string	NC	No divided message	
6	Parameter	Parameter			No parameter	
7	End Character	Message end character	binary	0x0d	CR	

(2) Answer

gdial\_0001\_00\_NC\_0↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	gdial		
2	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
3	Unit ID	Unit ID	string	00	See 2.2.2.	
4	Continue Select	Divided message system	string	NC	No divided message	
5	Parameter	Dial direction setting	string	0~1	0:Default / 1:Invert	

No	item	Description	type	value	value description	remarks
6	End Character	Message end character	binary	0x0d	CR	

#### 4.2.8 Jog Dial Direction Setting

(1) Set Command

sdial\_S\_0001\_00\_NC\_0↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	sdial		
2	Handshake Select	Sequence execution system	string	S		
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
4	Unit ID	Unit ID	string	00	See 2.2.2.	
5	Continue Select	Divided message system	string	NC	No divided message	
6	Parameter	Dial direction setting	string	0~1	0:Default / 1:Invert	
7	End Character	Message end character	binary	0x0d	CR	

#### 4.2.9 Jog Dial Direction Setting Change Notification

(1) Information

MD\_ndial\_0001\_00\_NC\_1↓

No	item	Description	type	value	value description	remarks
1	Modify	MD	string	MD		
2	Command	Command string	string	ndial		
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
4	Unit ID	Unit ID	string	00	See 2.2.2.	
5	Continue Select	Divided message system	string	NC	No divided message	
6	Parameter	Dial direction setting	string	0~1	0:Default / 1:Invert	
7	End Character	Message end character	binary	0x0d	CR	

## 4.3 Network Setting

### 4.3.1 Network Information Acquisition

(1) Get Command

gipnet\_O\_0001\_00\_NC\_↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	gipnet		
2	Handshake Select	Sequence execution system	string	O		
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.

### 4.7.1 EQ ON/OFF Setting Acquisition

#### (1) Get Command

geqenable\_O\_0001\_00\_NC\_1↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	geqenable		
2	Handshake Select	Sequence execution system	string	O		
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
4	Unit ID	Unit ID	string	00	See 2.2.2.	
5	Continue Select	Divided message system	string	NC	No divided message	
6	Parameter	CH number	string	1~4		
7	End Character	Message end character	binary	0x0d	CR	

#### (2) Answer

geqenable\_0001\_00\_NC\_1,1↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	geqenable		
2	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
3	Unit ID	Unit ID	string	00	See 2.2.2.	
4	Continue Select	Divided message system	string	NC	No divided message	
5	Parameter	CH number	string	1~4		
		EQ setting	string	0~1	0:OFF/ 1:ON	
6	End Character	Message end character	binary	0x0d	CR	

#### 4.7.2 EQ ON/OFF Setting

##### (1) Set Command

seqenable\_S\_0001\_00\_NC\_1,1↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	seqenable		
2	Handshake Select	Sequence execution system	string	S		
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
4	Unit ID	Unit ID	string	00	See 2.2.2.	
5	Continue Select	Divided message system	string	NC	No divided message	
6	Parameter	CH number	string	1~4		
		EQ setting	string	0~1	0:OFF/ 1:ON	
7	End Character	Message end character	binary	0xd	CR	

#### 4.7.3 EQ ON/OFF Setting Change Notification

##### (1) Information

MD\_neqenable\_0001\_00\_NC\_1,1↓

No	item	Description	type	value	value description	remarks
1	Modify	MD	string	MD		
2	Command	Command string	string	neqenable		
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
4	Unit ID	Unit ID	string	00	See 2.2.2.	
5	Continue Select	Divided message system	string	NC	No divided message	
6	Parameter	CH number	string	1~4		
		EQ setting	string	0~1	0:OFF/ 1:ON	
7	End Character	Message end character	binary	0xd	CR	

#### 4.7.4 EQ ON/OFF Setting Acquisition for Each Band

##### (1) Get Command

geqband\_O\_0001\_00\_NC\_1,1↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	geqband		
2	Handshake Select	Sequence execution system	string	O		
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
4	Unit ID	Unit ID	string	00	See 2.2.2.	
5	Continue Select	Divided message system	string	NC	No divided message	
6	Parameter	CH number	string	1~4		
		Band number	string	1~4		
7	End Character	Message end character	binary	0x0d	CR	

##### (2) Answer

geqband\_0001\_00\_NC\_1,1,1↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	geqband		
2	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
3	Unit ID	Unit ID	string	00	See 2.2.2.	
4	Continue Select	Divided message system	string	NC	No divided message	
5	Parameter	CH number	string	1~4		
		Band number	string	1~4		
		EQ setting	string	0~1	0:OFF/ 1:ON	
6	End Character	Message end character	binary	0x0d	CR	

#### 4.7.5 EQ ON/OFF Setting for Each Band

##### (1) Set Command

seqband\_S\_0001\_00\_NC\_1,1,1↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	seqband		
2	Handshake Select	Sequence execution system	string	S		
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
4	Unit ID	Unit ID	string	00	See 2.2.2.	
5	Continue Select	Divided message system	string	NC	No divided message	
6	Parameter	CH number	string	1~4		
		Band number	string	1~4		
		EQ setting	string	0~1	0:OFF/ 1:ON	
7	End Character	Message end character	binary	0x0d	CR	

#### 4.7.6 EQ ON/OFF Setting Change Notification for Each Band

##### (2) Information

MD\_neqband\_0001\_00\_NC\_1,1,1↓

No	item	Description	type	value	value description	remarks
1	Modify	MD	string	MD		
2	Command	Command string	string	neqband		
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
4	Unit ID	Unit ID	string	00	See 2.2.2.	
5	Continue Select	Divided message system	string	NC	No divided message	
6	Parameter	CH number	string	1~4		
		Band number	string	1~4		
		EQ setting	string	0~1	0:OFF/ 1:ON	

No	item	Description	type	value	value description	remarks
7	End Character	Message end character	binary	0x0d	CR	

#### 4.7.7 EQ Gain Setting Acquisition for Each Band

##### (1) Get Command

geqbandgain\_O\_0001\_00\_NC\_1,1↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	geqbandgain		
2	Handshake Select	Sequence execution system	string	O		
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
4	Unit ID	Unit ID	string	00	See 2.2.2.	
5	Continue Select	Divided message system	string	NC	No divided message	
6	Parameter	CH number	string	1~4		
		Band number	string	1~4		
7	End Character	Message end character	binary	0x0d	CR	

##### (2) Answer

geqbandgain\_0001\_00\_NC\_1,1,51↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	geqbandgain		
2	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
3	Unit ID	Unit ID	string	00	See 2.2.2.	
4	Continue Select	Divided message system	string	NC	No divided message	
5	Parameter	CH number	string	1~4		
		Band number	string	1~4		

No	item	Description	type	value	value description	remarks
		Gain setting	string	0~72	0:-18dB ~ 72:+18dB (0.5dB Step)	
6	End Character	Message end character	binary	0x0d	CR	

#### 4.7.8 EQ Gain Setting for Each Band

##### (1) Set Command

**seqbandgain\_S\_0001\_00\_NC\_1,1,51↓**

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	seqbandgain		
2	Handshake Select	Sequence execution system	string	S		
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
4	Unit ID	Unit ID	string	00	See 2.2.2.	
5	Continue Select	Divided message system	string	NC	No divided message	
6	Parameter	CH number	string	1~4	CH number	
		Band number	string	1~4	Band number	
		Gain setting	string	0~72	0:-18dB ~ 72:+18dB (0.5dB Step)	
7	End Character	Message end character	binary	0x0d	CR	

#### 4.7.9 EQ Gain Setting Change Notification for Each Band

##### (1) Information

**MD\_neqbandgain\_0001\_00\_NC\_1,1,51↓**

No	item	Description	type	value	value description	remarks
1	Modify	MD	string	MD		
2	Command	Command string	string	neqbandgain		

No	item	Description	type	value	value description	remarks
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
4	Unit ID	Unit ID	string	00	See 2.2.2.	
5	Continue Select	Divided message system	string	NC	No divided message	
6	Parameter	CH number	string	1~4	CH number	
		Band number	string	1~4	Band number	
		Gain setting	string	0~72	0~-18dB ~ 72:+18dB (0.5dB Step)	
7	End Character	Message end character	binary	0xd0	CR	

#### 4.7.10 EQ Frequency Setting Acquisition for Each Band

(1) Get Command

geqbandfreq\_O\_0001\_00\_NC\_1,1↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	geqbandfreq		
2	Handshake Select	Sequence execution system	string	O		
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
4	Unit ID	Unit ID	string	00	See 2.2.2.	
5	Continue Select	Divided message system	string	NC	No divided message	
6	Parameter	CH number	string	1~4		
		Band number	string	1~4		
7	End Character	Message end character	binary	0xd0	CR	

(2) Answer

geqbandfreq\_0001\_00\_NC\_1,1,25↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	geqbandfreq		
2	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
3	Unit ID	Unit ID	string	00	See 2.2.2.	
4	Continue Select	Divided message system	string	NC	No divided message	
5	Parameter	CH number	string	1~4		
		Band number	string	1~4		
		Frequency setting	string	0~480	See the end of the document.	
6	End Character	Message end character	binary	0x0d	CR	

#### 4.7.11 EQ Frequency Setting for Each Band

##### (1) Set Command

```
seqbandfreq_S_0001_00_NC_1,1,25↓
```

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	seqbandfreq		
2	Handshake Select	Sequence execution system	string	S		
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
4	Unit ID	Unit ID	string	00	See 2.2.2.	
5	Continue Select	Divided message system	string	NC	No divided message	
6	Parameter	CH number	string	1~4	CH number	
		Band number	string	1~4	Band number	
		Frequency setting	string	0~480	See EQ Frequency Table at the end of the document.	
7	End Character	Message end character	binary	0x0d	CR	

#### 4.7.12 EQ Frequency Setting Change Notification for Each Band

##### (1) Information

MD\_neqbandfreq\_0001\_00\_NC\_1↓

No	item	Description	type	value	value description	remarks
1	Modify	MD	string	MD		
2	Command	Command string	string	neqbandfreq		
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
4	Unit ID	Unit ID	string	00	See 2.2.2.	
5	Continue Select	Divided message system	string	NC	No divided message	
6	Parameter	CH number	string	1~4	CH number	
		Band number	string	1~4	Band number	
		Frequency setting	string	0~480	See EQ Frequency Table at the end of the document.	
7	End Character	Message end character	binary	0x0d	CR	

#### 4.7.13 EQ Q Setting Acquisition for Each Band

##### (1) Get Command

geqbandq\_O\_0001\_00\_NC\_1,1↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	geqbandq		
2	Handshake Select	Sequence execution system	string	O		
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
4	Unit ID	Unit ID	string	00	See 2.2.2.	
5	Continue Select	Divided message system	string	NC	No divided message	
6	Parameter	CH number	string	1~4		
		Band number	string	1~4		
7	End Character	Message end character	binary	0x0d	CR	

(2) Answer

geqbandq\_0001\_00\_NC\_1,1,6↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	geqbandq		
2	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
3	Unit ID	Unit ID	string	00	See 2.2.2.	
4	Continue Select	Divided message system	string	NC	No divided message	
5	Parameter	CH number	string	1~4		
		Band number	string	1~4		
		Q setting	string	0~31	See EQ Quality Table at the end of the document.	
6	End Character	Message end character	binary	0x0d	CR	

#### 4.7.14 EQ Q Setting for Each Band

(1) Set Command

seqbandq\_S\_0001\_00\_NC\_1,1,6↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	seqbandq		
2	Handshake Select	Sequence execution system	string	S		
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
4	Unit ID	Unit ID	string	00	See 2.2.2.	
5	Continue Select	Divided message system	string	NC	No divided message	
6	Parameter	CH number	string	1~4	CH number	
		Band number	string	1~4	Band number	

No	item	Description	type	value	value description	remarks
		Q setting	string	0~31	See EQ Quality Table at the end of the document.	
7	End Character	Message end character	binary	0x0d	CR	

#### 4.7.15 EQ Q Setting Change Notification for Each Band

(1) Information

MD\_neqbandq\_0001\_00\_NC\_1↓

No	item	Description	type	value	value description	remarks
1	Modify	MD	string	MD		
2	Command	Command string	string	neqbandq		
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
4	Unit ID	Unit ID	string	00	See 2.2.2.	
5	Continue Select	Divided message system	string	NC	No divided message	
6	Parameter	CH number	string	1~4	CH number	
		Band number	string	1~4	Band number	
		Q setting	string	0~31	See EQ Quality Table at the end of the document.	
7	End Character	Message end character	binary	0x0d	CR	

#### 4.7.16 EQ Filter Type Setting Acquisition for Each Band

(1) Get Command

geqbandtype\_O\_0001\_00\_NC\_1,1↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	geqbandtype		
2	Handshake Select	Sequence execution system	string	O		

No	item	Description	type	value	value description	remarks

7	End Character	Message end character	binary	0x0d	CR	

#### 4.10 Other Functions

4.10.1 2.4 GHz Band RF Scan Start/End

(1) Request Command

rsys20rfscan\_S\_000N\_00\_NC\_1↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	rsys20rfscan		

No	item	Description	type	value	value description	remarks
2	Handshake Select	Sequence execution system	string	S		
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
4	Unit ID	Unit ID	string	00	See 2.2.2.	
5	Continue Select	Divided message system	string	NC	No divided message	
6	Parameter	Scan start/end	string	0~1	0: End/1: Start	
7	End Character	Message end character	binary	0x0d	CR	

#### 4.10.2 2.4 GHz Band RF Scan Result Notification

After starting RF scan, RX sends a UDP notification every 10 seconds.

Since the notification cannot be completed by a single command, the notification is divided into multiple times.

##### (1) Information

MD\_nsys20rfscan\_0001\_00\_NC\_1↓

No	item	Description	type	value	value description	remarks
1	Modify	MD	string	MD		
2	Command	Command string	string	nsys20rfscan		
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
4	Unit ID	Unit ID	string	00	See 2.2.2.	
5	Continue Select	Divided message system	string	NC	No divided message	
6	Parameter	Leading frequency of data [MHz] Ending frequency of data [MHz] Number of data Final data flag RSSI	string	2400~2480 2400~2480 1~80 0~1 0~-120dBm ~ 100:-20dBm		Stored as much as the number of data
7	End Character	Message end character	binary	0x0d	CR	

#### 4.10.3 RX Identify Request

##### (1) Request Command

rdflp\_S\_000N\_00\_NC\_0↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	rdflp		
2	Handshake Select	Sequence execution system	string	S		
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
4	Unit ID	Unit ID	string	00	See 2.2.2.	
5	Continue Select	Divided message system	string	NC	No divided message	
6	Parameter	Identify start	string	0~1	0, 1: Identify start	
7	End Character	Message end character	binary	0x0d	CR	

#### 4.10.4 Preset Recall Request

##### (1) Request Command

rrecallpreset\_S\_000N\_00\_NC\_↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	rrecallpreset		
2	Handshake Select	Sequence execution system	string	S		
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
4	Unit ID	Unit ID	string	00	See 2.2.2.	
5	Continue Select	Divided message system	string	NC	No divided message	
6	Parameter	No parameter	string			
7	End Character	Message end character	binary	0x0d	CR	

#### 4.10.5 Factory Reset Request

##### (1) Request Command

rfactoryreset\_S\_000N\_00\_NC\_↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	rfactoryreset		
2	Handshake Select	Sequence execution system	string	S		
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
4	Unit ID	Unit ID	string	00	See 2.2.2.	
5	Continue Select	Divided message system	string	NC	No divided message	
6	Parameter	No parameter				
7	End Character	Message end character	binary	0x0d	CR	

#### 4.10.6 Reboot Request

##### (1) Request Command

rreboot\_S\_000N\_00\_NC\_↓

No	item	Description	type	value	value description	remarks
1	Command	Command string	string	rreboot		
2	Handshake Select	Sequence execution system	string	S		
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
4	Unit ID	Unit ID	string	00	See 2.2.2.	
5	Continue Select	Divided message system	string	NC	No divided message	
6	Parameter	No parameter				
7	End Character	Message end character	binary	0x0d	CR	

#### 4.10.7 Reboot Completion Notification

##### (1) Information

MD\_nreboot\_000N\_00\_NC\_2,1↓

No	item	Description	type	value	value description	remarks
1	Modify	MD	string	MD		
2	Command	Command string	string	nreboot		
3	RxLink ID	RxLink ID	string	0001~0005	See 2.2.2.	
4	Unit ID	Unit ID	string	00	See 2.2.2.	
5	Continue Select	Divided message system	string	NC	No divided message	
6	Parameter	Operation type at reset	string	1~2	1: Local operation (button operation) 2: Remote operation (IP operation)	
		Reset type	string	1~5	1: Reset only (Single reboot, etc.) 2: Factory reset, including pressing and holding the button 3: Preset reset 4: Reset to apply network setting change 5: Firmware update	
7	End Character	Message end character	binary	0x0d	CR	

## 5 Appendix
